QUESTION 1

A company's Dell EMC Avamar server has a 30 day backup retention period. A request was made to restore a file that was deleted 35 days ago. The Avamar server has been running daily maintenance and backup windows successfully.

Will the requested file be available on the Avamar server and why?

- A. No, garbage collection has been running and deletes unused chunks from backups that have expired.
- B. Yes, the latest checkpoint will have the file.
- C. No, HFS check has been running and deletes unused chunks from backups that have expired.
- D. Yes, by default the Avamar server only runs garbage collection once a week.

Correct Answer: A

QUESTION 2

What is a characteristic of a Dell EMC Avamar replication?

- A. Only select clients should be replicated
- B. Replication uses a small initial window
- C. Replication data should always be filtered
- D. Replication uses 60-80% of available bandwidth

Correct Answer: D
