QUESTION 1

What is the effect of changing the `Run Workspace Composer` setting from manual to automatic for an Agent in Administration > Agents?

- A. That cannot be done, as the Administration node is read-only.
- B. Users on that machine will get the RES Workspace Manager Shell instead of the Windows Shell.
- C. The RES Workspace Composer will be installed automatically on that Agent.
- D. The RES Workspace Composer will be started automatically for every user that logs on to that machine.

Correct Answer: D

QUESTION 2

When importing applications in the Workspace Designer several users are listed on the tab Slack

- A. These users have access to the application but will lose access with the chosen context rule.
- B. These users do not have access to the application but will gain access with the chosen context rule.
- C. These users will see the application in the start menu but will not be able to run the application.
- D. These users will not see the application in the start menu or on the desktop.

Correct Answer: B

QUESTION 3

An administrator has setup a new RES Workspace Manager environment that uses a database hosted on a Microsoft SQL Server to store its configuration. Company policy dictates that only Windows Authentication can be used to connect to the database. During the creation of the database the name of a security group was provided that holds all the user accounts that need to be able to use an RES Workspace Manager Console or access the database.

Which Windows service must be reconfigured to ensure that RES Workspace Manager works properly in this environment?

- A. The SQL Server Agent Service on the database server.
- B. The RES Workspace Manager Agent Service all Agent computers.
- C. The RES Workspace Manager Agent Service on each Relay Server.
- D. The RES Workspace Manager Console Service on the management server.

Correct Answer: B

QUESTION 4

Workspace Containers consist of

- A. Organizational Units.
- B. RES Workspace Manager Agents.
- C. Zones based on (partial) computer name.
- D. Applications made available for specific users.

Correct Answer: B

QUESTION 5

To create a failover printer connection, an administrator needs to configure a(n)

- A. Additional printer at the same Workspace Container.
- B. Backup printer for an existing connection.
- C. Backup printer with Advanced Printing Preferences.
- D. Additional printer with the same access control settings.

Correct Answer: B
