QUESTION 1

You want to protect your Relay Server against unauthorized Agent connections. How can that be done?

- A. Configure an Administrative Role without access to the Relay Servers.
- B. Enforce protocol encryption between the Relay Server and the Agents.
- C. Configure an environment password for the Relay Servers.
- D. Create a Scope without access to the Relay Servers.

Correct Answer: C

QUESTION 2

The environment is using the Relay Server. How can an administrator accomplish a direct database connection with an individual RES Workspace Manager Agent?

- A. Block the Relay Server in the firewall.
- B. Use the `Datastore connection` option in the `Connections` tab of the RES Workspace Manager Agent.
- C. Change the config.xml
- D. Set the option `Connect directly to the Datastore` on the Agents node.

Correct Answer: B

QUESTION 3

The SQL Server logging shows that new connections are refused on a regular basis because the SQL Server has reached the maximum amount of concurrent connections. As a result configuration changes are not replicated to all of the Agents in time because they cannot connect to the database. What needs to be done to prevent this from happening and make your infrastructure more scalable for the future while still maintaining a single point of configuration for the RES Workspace Manager environment?

- A. Deploy Relay Servers and configure the Agents to connect to the database indirectly (through those Relay Servers)
- B. Split the Datastore and have logging and tracking saved to a secondary database
- C. Create a new database and let half of the total number of Agents connect to the new database
- D. Migrate the database to a database server hosted on two or more clustered machines

Correct Answer: A

QUESTION 4

An administrator has configured an Action in RES Workspace Manager that contains the following Items: TEST1=1 TEST2=2 TEST3=3

Building Block "Z" contains the following settings: TEST 1 = NEW 1 TEST2=NEW 2 TEST 4= NEW 4

What is the BEST way to Import this Building Block with new settings while preserving the TEST3 setting?

- A. Import the Building Block and select "Merge".
- B. Add the TEST3 setting to the Building Block and import it.
- C. Create a Building Block of all settings, Import Building Block 2" and re-Import the settings using the Building Block.
- D. Create a Building Block of the TEST3 setting, import Building Block 2" and re-Import the TEST3 setting using the Building Block.

Correct Answer: A

QUESTION 5

Which of the following tasks are performed by the RES Workspace Manager Agent Service?

- 1.
Checking Datastore connectivity
 - 2.
Unlocking and locking the User Registry
 - 3.
Handle license requests
- A. Only 1
 - B. 1 and 2
 - C. 2 and 3
 - D. 1, 2 and 3

Correct Answer: D
