Correct Answer: C

QUESTION 4

If a DNS client wants to look up the IP address for good.news.com and does not receive an authoritative reply from its local DNS server, which name server is most likely to provide an authoritative reply?

- A. The news.com domain name server
- B. The .com (top-level) domain name server
- C. The .(root-level) domain name server
- D. The .gov (top-level) domain name server

Correct Answer: A

QUESTION 5

A US case involving malicious code is brought to trial. An employee had opened a helpdesk ticket to report specific instances of strange behavior on her system. The IT helpdesk representative collected information by interviewing the user and escalated the ticket to the system administrators. As the user had regulated and sensitive data on her computer, the system administrators had the hard drive sent to the company's forensic consultant for analysis and configured a new hard drive for the user. Based on the recommendations from the forensic consultant and the company's legal department, the CEO decided to prosecute the author of the malicious code. During the court case, which of the following would be able to provide direct evidence?

- A. The IT helpdesk representative
- B. The company CEO
- C. The user of the infected system
- D. The system administrator who removed the hard drive

Correct Answer: C
