QUESTION 1

George works as a Software Developer for GenTech Inc. He creates an application named App1 using Visual Studio .NET. App1 uses the version 2.0.0.0 of an assembly named Assembly1. However, he wants App1 to use a new version i.e.

2.1.0.0 of Assembly1. Therefore, he needs to specify Assembly1's location so that App1 can use version 2.1.0.0 of Assembly1. What will George use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

- A. An unmanaged code.
- B. A managed code.
- C. The element.
- D. The element.

Correct Answer: CD

Topic 4, Volume D

QUESTION 2

Allen works as a Software Developer for ABC Inc. The company uses Visual Studio.NET as its application development platform. He creates an application using .NET Framework. He wants to encrypt all his e-mails that he sends to anyone. Which of the following will he use to accomplish the task?

- A. PPP
- B. FTP
- C. PGP
- D. PPTP

Correct Answer: C

QUESTION 3

Maria works as a Software Developer for ManSoft Inc. She develops an application using Visual Studio .NET 2005. Maria wants to ensure that only employees of the Accounts department can view the application. Therefore, she decides to change the configuration settings in the Web.config file.

What will Maria do to accomplish the task?

- A. Add the element in the Web.config file. Then add the attribute in the element.
- B. Add the element in the Web.config file.

- C. Add the element in the Machine.config file. Then add the attribute in the element.
- D. Add the element in the Web.config file.

Correct Answer: B

QUESTION 4

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2005 as its application development platform. You create a remoting application that provides stock information to customers using .NET Framework. The server component raises an event on the client computer when certain conditions are met. You must ensure that the server raises exactly one event for each client application that is registered for the event. What will you do to accomplish this task?

- A. Configure the server class as a Singleton Activated Object (SAO) and check for duplicate client delegate methods before raising the event.
- B. Configure the server class as a Client Activated Object (CAO) and override the CreateObjRef method to check for duplicate client delegate methods before raising the event.
- C. Configure the server class as a SingleCall Activated Object (SAO) and check for duplicate client delegate methods before raising the event.
- D. Configure the server class as a Client Activated Object (CAO) and check for duplicate client delegate methods before raising the event.

Correct Answer: A

QUESTION 5

All of the following are benefits for query expressions allowed by Language-integrated query except for which one?

- A. Rich metadata
- B. Compile-time syntax checking
- C. Static typing and IntelliSense
- D. Imperative code

Correct Answer: D
