-  **800,000+** Satisfied Customers

QUESTION 1

An advertising agency stores multiple digital images, video, audio, file shares, and database data that originate from 10 source servers. Backups of the data are written to an HP StoreOnce backup device. The agency is experiencing poor deduplication performance in their backup environment.

What should the agency do to optimize deduplication performance of their backup solution?

- A. Enable software compression and synthetic full backups.
- B. Group libraries/shares with similar data types together for the source servers.
- C. Split virtual libraries across multiple Fibre Channel ports on the network.
- D. Setup a separate library/share for the source servers.

Correct Answer: B

QUESTION 2

A customer uses an HP Enterprise Backup Solution in a point-to-point configuration. In which directions does backup data flow between devices? (Select two.)

- A. from a backup server to a replication site
- B. from a host to a backup server
- C. from a backup server to a host
- D. from a host to a replication site
- E. from a backup server to a tape device

Correct Answer: BE

QUESTION 3

A customer plans to use an HP Enterprise Backup Solution in a point-to-point configuration. What should the customer use to attach the tape device to the backup server? (Select two.)

- A. Serial-attached SCSI (SAS)
- B. Fibre Channel
- C. SATA
- D. 10 Gb Ethernet
- E. USB

Correct Answer: AB

Fibre Channel is FAD (fibre channel attach-direct)

QUESTION 4

A customer's network has several servers that are connected to a single fabric. The network also has tape devices that are connected to different fabric. The customer wants to connect the servers to the tape devices without merging the two fabrics.

Which SAN device will allow the customer to archive this goal?

- A. multi-protocol router
- B. network storage router
- C. iSCSI gateway
- D. converged network switch

Correct Answer: A

QUESTION 5

A customer uses an HP Enterprise solution with Microsoft Windows Server hosts. The hosts unexpectedly lose connection to the tape devices. What should the customer enable on the hosts to ensure reliability?

- A. plug and play devices
- B. tape discovery
- C. persistent bindings
- D. Microsoft signed drivers

Correct Answer: C
