-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

#### QUESTION 1

A light is flashing on insight display, what does this mean?

- A. A user is connected to ILO
- B. There is an issue that needs to be addressed

Correct Answer: B

---

#### QUESTION 2

Where can you check software compatibility for an SB1760c Tape Blade?

- A. Library and Tape Tools Check Updates
- B. SPOCK
- C. EBS Design Guide
- D. EBS Matrix

Correct Answer: B

Reference: <http://h20272.www2.hp.com/>

---

#### QUESTION 3

Which components are required for Insight Control Server Deployment to work correctly? (Select two)

- A. PXE
- B. SNMP
- C. WBEM
- D. DNS
- E. DHCP

Correct Answer: AE

It could be argued that DNS is also required, but PXE and DHCP are far more critical...

---

#### QUESTION 4

What is the maximum number of BL680c G7 servers you can install in a c7000 rack enclosure?

- A. 4

- B. 8
- C. 12
- D. 16

Correct Answer: A

Reference: <http://www.cclonline.com/content/pdfs/Avmn2r-2fDmt0-2bfqFrquXjFQ-3d-3d.pdf> (page 4, 3rd bulleted point, first sub-bulleted point)

#### QUESTION 5

Which HP document provides up-to-date lists of tested drivers and firmware revisions for HP tape libraries?

- A. EBS Example Configuration Guide
- B. EBS Compatibility Matrix
- C. Library Compatibility Matrix
- D. EBS Design Guide

Correct Answer: B

<http://h18006.www1.hp.com/products/storageworks/ebs/pdf/EBSMatrix-0310.pdf>

The HP StorageWorks Enterprise Backup Solution (EBS) Compatibility Matrix provides information for designing data protection solutions, including backup/ restore and archiving, that scale from entry-level workgroups to enterprise-level data

centers. It includes support for Direct Attach SCSI (DAS), Direct Attach Fibre (DAF), and Storage Area Network (SAN). It does not imply product availability.

Updates/changes to individual fields within the Matrix will be highlighted in bold RED. Products highlighted in yellow will

be removed from the EBS Compatibility Matrix in the next release. Previous versions of the EBS Compatibility Matrix are

available on the web at .

[www.hp.com/go/ebs](http://www.hp.com/go/ebs)

HP partners with leading application and product vendors to provide backup/restore, archiving, and data security solutions. See below for information on the Extended Solution Interoperability (ESI) and Tape Automation Compatibility (TAC)

categories:

Extended Solution Interoperability (ESI): HP performs on-going interoperability and extensive solution testing with these applications to provide fully certified and supported data protection solutions that include HP tape libraries, autoloaders,

disk backup systems, and virtual library systems. Extensive solution details including operating system details, host bus adapter and driver information, SAN infrastructure, and extended tape library feature support can be found throughout

this document.

Tape Automation Compatibility (TAC): These products are verified for compatibility with HP tape libraries, autoloaders, disk backup systems, and virtual library systems. Consult the product compatibility guide(s) for additional support details

such as product version information, driver details, firmware revisions, patch levels, etc.

This document shows compatibility for SAN media servers. A SAN media server is defined as a server with direct access to backup devices. Other operating systems may be supported within EBS by the respective ISVs as LAN clients, where

a LAN client does not have direct access to the backup device but is backed up over a LAN connection to a server with devices highlighted in yellow direct access to backup devices.
