**QUESTION 1**

A customer purchased a 10700 G2 rack and with a fully populated C7000 and HP UPS R7000 what is the optimal position for the UPS and C7000 so the rack will be balanced?

- A. Put the C7000 on top and the UPS on the bottom
- B. Move the C7000 up and but the UPS right underneath
- C. Move the UPS on top of the C7000
- D. Move the UPS to the top of the rack and the C7000 to the bottom of the rack

Correct Answer: B

(Page 2) <http://bizsupport2.austin.hp.com/bc/docs/support/SupportManual/c00686846/c00686846.pdf>

Position

WARNING: To reduce the risk of personal injury or damage to the equipment, take the following precautions when installing the ERM.

- The ERM must be installed at the bottom of the rack, with the UPS on top of the ERM. If placed in the rack with existing equipment, the rack must be reconfigured to allow installation of the UPS and ERM at the bottom of the rack.
 - The ERM must be mounted on the fixed rails included in the ERM kit. Use the rack template tool shipped with the ERM kit to align the rails.
-

QUESTION 2

A customer wants an HP Care Pack to provides extended business hour support for hardware and software?

- A. Tech Support
- B. Optimized Care
- C. Proactive Select
- D. Basic Care

Correct Answer: C

QUESTION 3

Which KVM is assigned Master Status in a cascaded configuration?

- A. KVM Console Switch
- B. HP Server Console Switch G2 with Virtual Media and CAC
- C. IP Console Switch with Virtual Media and CAC
- D. HP Server Console Switch

Correct Answer: B

Changed my mind on this one as well...

Cascaded Configurations:

"An HP IP Console Switch G2 with Virtual Media and CAC can not be cascaded under a legacy Cat5 based HP Server Console Switch. "

"HP Server Console Switch G2 with Virtual Media and CAC" is still a normal switch, IP switches have higher priority
From another dump:

<http://h18004.www1.hp.com/products/servers/proliantstorage/rack-options/scs/vm/index-g2.html> In cascaded environments the HP IP and Server Console Switch G2 with Virtual Media and CAC can allow an administrator to manage up to 1024

servers across two tiers from a single console. When tiered with additional HP Server Console Switches with Virtual Media application installations and upgrades can be pushed through to any server on any of the two tiers from the top tier local console.

QUESTION 4

Definition of RPO

- A. It is the maximum tolerable period in which data might be lost from an IT service due to a major incident
- B. Time it takes to recover data
- C. How much data can be lost

Correct Answer: A

Recovery point objective http://en.wikipedia.org/wiki/Recovery_point_objective It is the maximum tolerable period in which data might be lost from an IT service due to a major incident.[1] The RPO gives systems designers a limit to work to. For instance, if the RPO is set to 4 hours, then in practice, offsite mirrored backups must be continuously maintained- a daily offsite backup on tape will not suffice.

RPO and RTO- a worked example

QUESTION 5

Which HP tool allows you to create a report of the complete firmware installed on an HP BladeSystem server?

- A. Server Migration
- B. Capacity Advisor
- C. Smart Update Manager
- D. ProLiant Support Pack

Correct Answer: C
