QUESTION 1

A customer has an HP Integrity rx2800 i2 server with one processor and two memory risers, each with four DIMMs. The customer added an additional memory riser with four memory DIMMs, but cannot see the additional memory at the

operating system level. The customer already swapped the first memory riser with the new one, but there is no change.

What could cause this issue?

A. One of the new DIMMs is faulty.

B. The new memory riser is faulty.

C. An additional license is needed for using more than two memory risers.

D. An additional processor is needed for using more than two memory risers.

Correct Answer: C

*The DIMMs are partitioned by the number of processors installed in the server. If you have only one processor installed in the system, you can only use 12 of the 24 memory slots. *

Table 10 Memory Load Order

Pair number	2 Processor system (socket 0 and 1)		1 Processor system (socket 0)	
	Memory expansion board	Memory slots	Memory expansion board	Memory slots
1	Memory expansion board 1	3A and 4A	Memory expansion board 1	3A and 4A
2	Memory expansion board 3	3A and 4A	Memory expansion board 2	3A and 4A
3	Memory expansion board 2	3A and 4A	Memory expansion board 1	1B and 6B
4	Memory expansion board 4	3A and 4A	Memory expansion board 2	1B and 6B
5	Memory expansion board 1	1B and 6B	Memory expansion board 1	2C and 5C
6	Memory expansion board 3	1B and 6B	Memory expansion board 2	2C and 5C
7	Memory expansion board 2	1B and 6B	—	—
8	Memory expansion board 4	1B and 6B	—	—
9	Memory expansion board 1	2C and 5C	—	—
10	Memory expansion board 3	2C and 5C	—	—

QUESTION 2

Match the correct UPS description with each picture.

QUESTION 3

While the system is online and the OS is operating, the HP Insight Diagnostics Diagnose feature performs diagnostics testing on which devices?

A. network interface cards only

B. memory and processors only

C. hard drives attached to an HP Smart array Controller and power supplies considered diagnosable

D. memory, processors, and network interface cards

Correct Answer: C

Using the Diagnose tab

While the system is online and the OS is operating, the HP Insight Diagnostics Diagnose feature performs diagnostics testing on the following devices:

*

 Hard drives attached to an HP Smart Array Controller

*

 Power supplies that are deemed diagnosable

QUESTION 4

What does adding the battery or flash backed cache upgrade NOT enable?

A. RAID 60 migration

B. array expansion

C. logical drive extension

D. stripe size migration

Correct Answer: C

Note:

* Error checking and correcting (ECC) DRAM technology protects the data while it is in cache. Smart Array battery-backed or flash-backed cache backup mechanisms protect the cache data against a server crash and power loss.

QUESTION 5

Which statement is correct?

A. The mandatory CSR guideline applies to customers who upgrade their warranty support to carepack or contract maintenance.

B. The mandatory CSR guideline does not apply to customers who upgrade their warranty support to carepack or contract maintenance.

C. Mandatory and optional CSR guidelines only apply to a product with a warranty service level agreement.

D. The optional CSR guideline does not apply to customers who upgrade their warranty support to carepack or contract maintenance.

Correct Answer: B

Currently, HP identifies two types of Customer Self Repair parts - \\'Mandatory\\' and \\'Optional\\'. \\'Mandatory\\' requires standard warranty customers to perform part replacement or pay for HP service. Self repair is optional for customers with an HP Care Pack or support agreement. \\'Optional\\' allows the customer to perform part replacement or have HP service personnel perform it at no additional charge during the product warranty period.
