QUESTION 1

Which two statements are correct with regard to the introduction of a requirements engineering tool? (2 Points)

- A. The introduction of a tool defines the future requirements engineering approach
- B. Risks associated with the introduction can be identified through a pilot operation
- C. The requirements engineering processes must be clearly defined before introduction
- D. The license costs are generally the greatest cost block relating to the introduction of a requirements engineering tool

Correct Answer: CD

QUESTION 2

Starting from an informal and unstructured description of the facts, semiformal description techniques attempt to take a step in the direction of formality, for example to prevent misunderstandings. One of the semiformal description techniques is the sentence-template. What is the most precise definition of a sentence-template as used for requirements? (1 Point)

- A. A sentence-template is a blueprint for a requirement.
- B. A sentence-template is a blueprint for the semantic filling of the individual requirement elements.
- C. A sentence-template is a blueprint for the syntax and semantics of a requirement.
- D. A sentence-template is a blueprint for the syntactical structure of an individual requirement.

Correct Answer: D

QUESTION 3

You have been commissioned to analyze a change request for its possible impact. Which of the following aspects must be analyzed for this? (2 Points)

Analyze	Do not analyze	
A	B	The justification of the change
C	D	The test cases to be altered due to the change
E	F	The effort involved in making the change
G	H	The stakeholders affected by the change

- A. B, C, E, G

Correct Answer: A

QUESTION 4

A new system for monitoring vital functions of patients is to be developed. The system is to be used in intensive care. The usability of the system is especially critical, primarily because the nursing staff must correctly interpret the information indicated by the system and do so under great time pressure. Which two techniques are best suited to identifying the user requirements? (2 Points)

- A. Questionnaires / interviews
- B. Apprenticing
- C. Field surveys
- D. Role playing
- E. Brainstorming

Correct Answer: AD

QUESTION 5

The following state diagram is to be found in a requirements specification for an order management system. Which of the following requirements is consistent with the diagram and which are not? (2 Points)

Consistent	Not consistent	
A	B	An invoice may only be issued after the products listed on it have been dispatched.
C	D	A product that is not in stock is sent directly by the supplier.
E	F	Every order results in at least one invoice.
G	H	All products ordered are delivered, except if they are discontinued by the supplier.

- A. A, D, F, G

Correct Answer: A
