QUESTION 1

Dynamic DNS provides which of the following services?

A. Automatic registration of host records

B. Translates public host names to private host names

C. Provides round robin load balancing for web servers

D. Provides aliases for additional search suffixes

Correct Answer: A

QUESTION 2

A technician needs multiple networks, high speeds, and redundancy on a system. Which of the following configurations should be considered for these requirements? (Select TWO).

A. Routing table

B. Next hop

C. Port mirroring

D. Port monitoring

E. VLANs

Correct Answer: CE

Port mirroring is used on a network switch to send a copy of network packets seen on one switch port (or an entire VLAN) to a network monitoring connection on another switch port. This is commonly used for network appliances that require monitoring of network traffic, such as an intrusion detection system, passive probe or real user monitoring (RUM) technology that is used to support application performance management (APM).

In computer networking, a single layer-2 network may be partitioned to create multiple distinct broadcast domains, which are mutually isolated so that packets can only pass between them via one or more routers; such a domain is referred to as a Virtual Local Area Network, Virtual LAN or VLAN.

QUESTION 3

A technician has configured a router to authenticate VPN users to an LDAP server on the network. In order to allow the authentication service, both UDP and TCP ports needed to be allowed on the router. Which of the following services was MOST likely used?

A. Kerberos

B. TACACS+

C. RADIUS

D. 802.1x

Correct Answer: C

QUESTION 4

A large company has experienced Internet slowdowns as users have increased their use of the Internet. Which of the following can the Network Administrator use to determine the amount of bandwidth used by type of application?

A. Network maps

B. Traffic analysis

C. Syslog

D. ICMP

Correct Answer: B

By traffic analysis administrator will come to whether user are using bandwidth for right purpose or not.

QUESTION 5

It has been suspected that one of the users is using the network inappropriately. As a preventive measure HR has authorized the IT department to enable port mirroring on the user\\'s network port. Which of the following devices would be used to monitor the network activity?

A. Port analyzer

B. Multimeter

C. Network sniffer

D. Cable certifier

Correct Answer: C
