QUESTION 1

You are the security administrator. You need to determine the types of security. Drag the items “Types of Security” to appropriate Security devices.

Configure the Firewall

Task: Configure the firewall (fill out the table) to allow these four rules:

1. Only allow the Accounting computer to have HTTPS access to the Administrative server.
2. Only allow the HR computer to be able to communicate with the Server 2 System over SCP.
3. Allow the IT computer to have access to both the Administrative Server 1 and Administrative Server 2

Correct Answer: Use the following answer for this simulation task.

Explanation/Reference:

Source IP	Destination IP	Port number	TCP/UDP	Allow Deny
10.4.255.10	10.4.255.101	443	TCP	Allow
10.4.255.10	10.4.255.2	22	TCP	Allow
10.4.255.10	10.4.255.101	Any	Any	Allow
10.4.255.10	10.4.255.102	Any	Any	Allow

www.Pass4Lead.com

Note: All servers in the bottom have the same IP address, so something is wrong with this question.

QUESTION 2

The security administrator has installed a new firewall which implements an implicit DENY policy by default Click on the firewall and configure it to allow ONLY the following communication.

1. The Accounting workstation can ONLY access the web server on the public network over the default HTTPS port. The accounting workstation should not access other networks.
2. The HR workstation should be restricted to communicate with the Financial server ONLY, over the default SCP port.
3. The Admin workstation should ONLY be able to access the servers on the secure network over the default TFTP port.

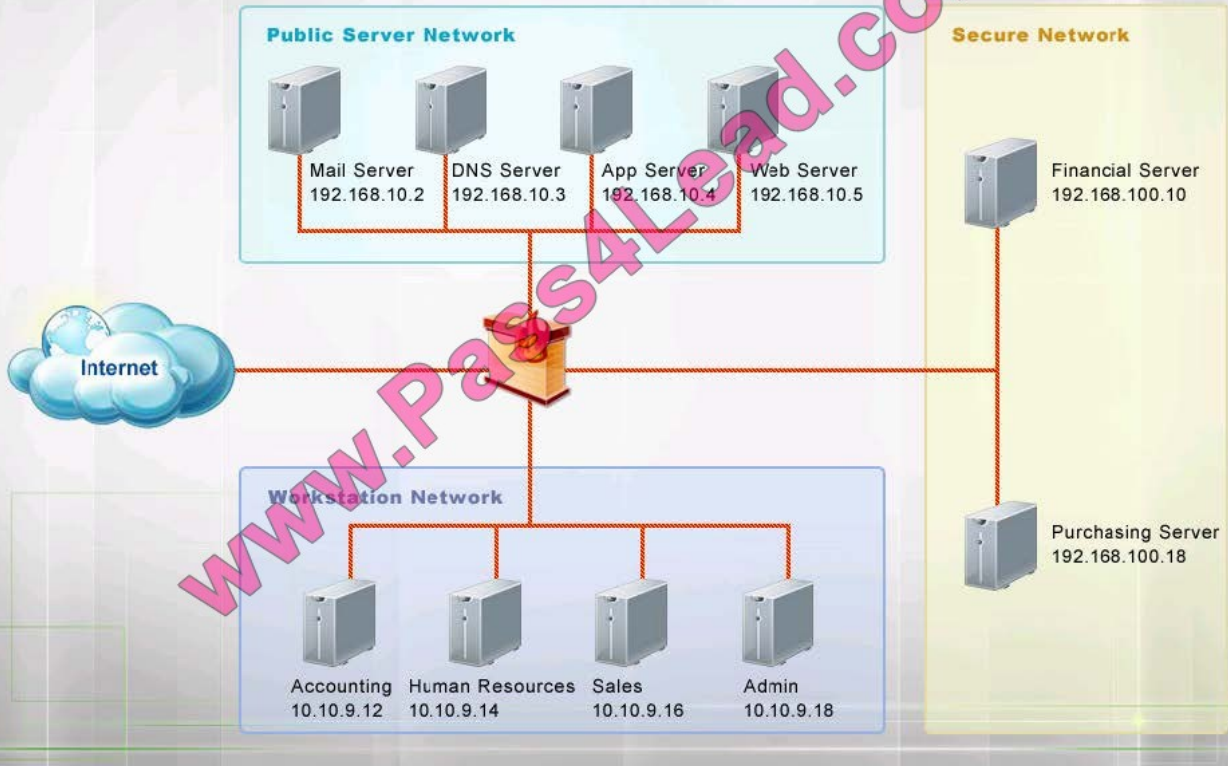

Instructions: The firewall will process the rules in a top-down manner in order as a first match The port number must be typed in and only one port number can be entered per rule Type ANY for all ports. The original firewall configuration can be reset at any time by pressing the reset button. Once you have met the simulation requirements, click save and then Done to submit.

QUESTION 4

A forensic analyst is asked to respond to an ongoing network attack on a server. Place the items in the list below in the correct order in which the forensic analyst should preserve them.

Select and Place:

1

2

3

4

- RAM
- CPU cache
- Swap
- Hard drive

Correct Answer:

1 CPU cache

2 RAM

3 Swap

4 Hard drive

QUESTION 5

You are the security administrator. You need to determine the types of security. Drag the items “Types of Security” to appropriate Security devices.

Select and Place:

Types of Security

1. GPS Tracking
2. Mantrap
3. Remote wipe
4. Strong Passwords
5. Cable lock
6. Biometrics
7. Proximity Badges
8. FM-200
9. HVAC
10. Device Encryption
11. Antivirus

Task: Drag the items on the left to show the different types of security for the shown devices. Not all fields need to be filled. Not all items need to be used.

Mobile Device Security	Server in Data Center Security
