QUESTION 1

The same Web site is visited for the second time using a branch SRX Series Services Gateway configured with Surf Control integrated Web filtering.

Which statement is true?

A. The SRX device sends the URL to the SurfControl server in the cloud and the SurfControl server provides the SRX with a category of the URL.

B. The SRX device sends the URL to the SurfControl server in the cloud and the SurfControl server asks the SRX device to permit the URL as it has been previously visited.

C. The SRX device looks at its local cache to find the category of the URL.

D. The SRX device does not perform any Web filtering operation as the Web site has already been visited.

Correct Answer: C

QUESTION 2

Which statement is true about SurfControl integrated Web filter solution?

A. The SurfControl server in the cloud provides the SRX device with the category of the URL as well as the reputation of the URL.

B. The SurfControl server in the cloud provides the SRX device with only the category of the URL.

C. The SurfControl server in the cloud provides the SRX device with only the reputation of the URL.

D. The SurfControl server in the cloud provides the SRX device with a decision to permit or deny the URL.

Correct Answer: B

QUESTION 3

Which statement is true about implementing IP spoofing protection as a Junos Screen option?

A. It ensures that the active route to the source has the same egress interface as the ingress interface for the packet.

B. It ensures that a route, active or not, to the source exists with the same egress interface as the ingress interface of the packet

C. It ensures that the active route to the source has the same egress zone as the ingress zone for the packet

D. It ensure that a route, active or not, to the source exists with the same egress zone as the ingress zone for the packet.

Correct Answer: A
