**QUESTION 1**

Herman has created a new design for his Video application. He would like to post the design to the server and make it available so other applications can automatically inherit the design changes when the DESIGN server tasks runs. Which one of the following should Herman to do make the new design available on the development server?

- A. Copy the application to the development server, name it "newvideo.ntf", and select "Update on DESIGN task" in the application Design properties.
- B. Copy the application to the development server, name it "newvideo.ntf", and select "Allow inheritance" in the application Design properties.
- C. Copy the application to the development server, name it "newvideo.ntf", select "Inherit design from master template", and give it a template name in the application Design properties.
- D. Copy the application to the development server, name it "newvideo.ntf", select "Database file is a master template", and give it a template name in the application Design properties.

Correct Answer: D

QUESTION 2

Malik needs to find all the design elements that reference a particular field in his database. How could he accomplish this?

- A. Edit - Find Next
- B. Edit - Find/Replace
- C. File - Application - Analyze Design
- D. File - Application - Design Synopsis

Correct Answer: D

QUESTION 3

Erica is writing a formula to determine the number of elements in a list. She wants to ensure that a nonzero positive value is returned, even if the value her @Function is evaluating turns out to be a null string. Which one of the following can she do to accomplish this?

- A. Use a default formula of 1
- B. Use @Elements and add 1 to the total
- C. Use the @Count function instead of @Elements
- D. Use @Elements([PosInteger]) to ensure that the desired format is returned

Correct Answer: C

QUESTION 4

Mahesh must ensure that only users with the DbAdmin role can edit the Price field on the Product form. The other fields on the form are editable by all users. How can Mahesh restrict who can edit the Price field?

- A. Place the Price field in a computed subform.
- B. Add an Input Enabled formula to the Price field. Use the formula: @IsMember("[DbAdmin]"; @UserRoles)
- C. From the Security tab of the Field Properties, select the [DbAdmin] role in the Edit Enabled option.
- D. Add a computed Authors field to the Product form. For the field value, specify: @If(@ThisName="Price"; "[DbAdmin]"; "")

Correct Answer: B

QUESTION 5

Herman has created a new design for his Video application. He would like to post the design to the server and make it available so other applications can automatically inherit the design changes when the DESIGN server tasks runs. Which one of the following should Herman to do make the new design available on the development server?

- A. Copy the application to the development server, name it "newvideo.ntf", and select "Update on DESIGN task" in the application Design properties.
- B. Copy the application to the development server, name it "newvideo.ntf", and select "Allow inheritance" in the application Design properties.
- C. Copy the application to the development server, name it "newvideo.ntf", select "Inherit design from master template", and give it a template name in the application Design properties.
- D. Copy the application to the development server, name it "newvideo.ntf", select "Database file is a master template", and give it a template name in the application Design properties.

Correct Answer: D
