**QUESTION 1**

Under the Windows platform, there is something referred to as Null Session.

Which of the following statements would best describe what a null session consists of?

- A. It is a session where zero bytes of traffic have been transferred
- B. It is a session where erroneous commands are being used showing the lack of knowledge of the user connected.
- C. It is a remote session that is established anonymously to a Windows machine.
- D. It is an anonymous FTP session under the Windows platform

Correct Answer: C

---

**QUESTION 2**

Which of the following actions can often be used as countermeasures to port scans? Choose all that apply.

- A. Block unassigned port traffic
- B. Monitor transport-layer connections (control of TCP, SYN, RST, ACK)
- C. Block ICMP type 3 and 8
- D. Use active network monitoring

Correct Answer: ABCD

---

**QUESTION 3**

BASIC authentication for HTTP authentication is universally understood but has the disadvantage of passing username and password in BASE64 encoding. What technology could be used to encrypt the BASE64 encoding and thus secure BASIC authentication for all web browsers and all Internet users? Choose the best answer.

- A. SSH
- B. IPsec
- C. SSL
- D. IKE

Correct Answer: C

---

**QUESTION 4**

What program can locate computers running sniffers by sending out special ARP packets that only network cards in

promiscuous mode will reply to? Choose the best answer.

- A. ARPwatch
- B. Cain and Abel
- C. Macof
- D. Microsoft Network Monitor

Correct Answer: D

---

#### QUESTION 5

You have been asked to assist an investigation team in collecting data and evidence related to an internal hacking case.

The investigator in charge of the case would like to capture all keystrokes from the suspect but is afraid the employee under investigation who possesses great technical skills might have installed integrity tools on his system that would detect any new software installed.

What solution would be best to use to reach the investigator requirement?

- A. Disable the integrity tools in place
- B. Install a software key logger that does not show in the process list
- C. Install a hardware based key logger
- D. Sniff all traffic and keystrokes from the network

Correct Answer: C
