QUESTION 1

You are troubleshooting a clustered failover problem at a customer site. The customer explains that both storage appliances were NFS mounted onto the Solaris host. You attempt to create a file on the NFS mount point for the inaccessible appliance, but you get the following error:NFS server filer2 not responding still trying.Symptoms:

1) When not in takeover mode, both storage appliances operate normally.

2) In takeover mode, the taken over node is not accessible on the network.You perform a "cf giveback"

and you can now create a file over NFS on both appliances.

What should vou do first to resolve this issue?

A. Replace the cluster interconnect card and run diagnostics "all" to ensure proper system operation.

B. Replace the NIC adapter.

C. Use the cluster-config-checker.cgi to identify the problem and corrective action.

D. Submit a new bug report.

Correct Answer: C

QUESTION 2
