#### QUESTION 1

In UML, what kind of behaviors are state machines used to describe?

- A. discrete
- B. continuous
- C. software based
- D. continuous or discrete

Correct Answer: A

---

#### QUESTION 2

What is the difference between a tag definition and a tagged value?

- A. They are synonyms.
- B. The properties of metaclasses are sometimes referred to as tag definitions. When a metaclass is applied to a model element, the values of the properties may be referred to as tagged values.
- C. The properties of stereotypes are sometimes referred to as tag definitions. When a stereotype is applied to a model element, the values of the properties may be referred to as tagged values.
- D. The properties of stereotypes are sometimes referred to as tagged values. When a stereotype is applied to a model element, the values of the properties may be referred to as tag definitions.

Correct Answer: C

---

#### QUESTION 3

What is true about guards on interaction operands?

- A. must always cover all lifelines covered by the operand
- B. should not refer to any dynamic variables, i.e., to attributes of the lifelines
- C. must cover the same lifelines on all interaction operands within one combined fragment
- D. must only cover one lifeline, namely the one lifeline having the first event occurrence of the interaction operand

Correct Answer: D

---

#### QUESTION 4

What might a connector specify?

- A. links
- B. classes
- C. messages
- D. associations
- E. dependencies

Correct Answer: A

---

#### QUESTION 5

What is NOT true of a profile?

- A. A profile can be removed at any time from a model.
- B. A profile can be combined with others applied on the same model.
- C. Applying a profile means that it is required to apply the stereotypes that are part of the profile.
- D. Applying a profile means that it is allowed, but not required to apply the stereotypes that are part of the profile.

Correct Answer: C
