### QUESTION 1

A user wants to create and schedule a job which runs a Modeler stream, stored in the repository. Which CandDS component should he use?

- A. Deployment Portal
- B. Deployment Manager
- C. BIRT Report Designer
- D. SPSS Modeler

Correct Answer: B

---

### QUESTION 2

If an end user wants to prevent others from making changes to an object while he is making a change to that same object, what process should he follow?

- A. Download the object from the repository, make necessary changes and then upload the object back into the repository.
- B. Lock the object until changes have been completed.
- C. Set object permission to Exclude until changes have been completed.
- D. Right click on object and select '\\Work Offline\\' option, make necessary changes and then right click and select '\\Resume\\' option.

Correct Answer: B

---

### QUESTION 3

An administrator applied a patch to the CandDS installation and started the server. A user, using the Deployment Manager windows client, is complaining that an issue that the patch should have fixed in the client is not working. What should the administrator check to resolve this?

- A. Ensure the user downloaded and manually installed the corresponding client patch.
- B. Verify if the client license is still valid.
- C. The only way to install a client update is to re-download the Deployment Manager client from the server. Make sure that this has been done.
- D. Ensure the user restarted the Deployment Manager Windows client, after having received a version update message.

Correct Answer: D

---

#### QUESTION 4

If an end user knew the name of an object but was not sure of its location, how could the end user find the object within the repository?

- A. Tools => Find menu.
- B. Locate dialogs found under the Tools menu.
- C. Right-click the Content Server Connection folder and select the '\\Search\\' option.
- D. Search menu within Server Administration tab.

Correct Answer: C

---

#### QUESTION 5

If the keystore file that is generated during the CandDS installation is inadvertently deleted from the system, which of the following steps must be performed to recover?

- A. Execute the genkey utility within the \bin directory.
- B. Enable encryption within the Tools => Security menu.
- C. Manually create a new keystore file in the expected location.
- D. CandDS will need to be reinstalled.

Correct Answer: D
