QUESTION 1

What is the significance of F_Originator field in a work flow?

- A. It is a special work flow group that represents the name of the user who launched the business process.
- B. It is user defined data field which the work flow designer uses to represent the name of the user who will launch the business process.
- C. A and B.
- D. At launch time, the system assigns the name of the launch user to F_Originator.

Correct Answer: C

QUESTION 2

Which of these are TYPICAL uses for extending P8 with subscription event handlers?

- A. Generating nightly statistical reports of the numbers of documents using storage areas.
- B. Checking a database partition for adequate space before storing large content.
- C. Monitoring server environmental factors like temperature and power consumption.
- D. Launching a workflow in response to a document creation, modification, or deletion.

Correct Answer: D

QUESTION 3

P8 follows industry practices in separating authentication (validating the identity of users) from authorization (controlling access to resources for identified users).

Which of the following is TRUE for P8's handling of authentication and authorization?

- A. Authentication is handled by the application server. Authorization is handled by P8.
- B. Authorization is handled by the application server. Authentication is handled by P8.
- C. P8 can handle authentication if the Password Synchronization feature is enabled.
- D. The Old Dogs New Tricks (ODNT) policy mechanism can be used to supplement the internal P8 authorization calculations.

Correct Answer: A

QUESTION 4

You have an exported business process application, in what order do you complete these tasks to deploy it into the target environment? 1.Import the converted workflows and other Content Platform Engine assets using FileNet Deployment Manager 2.Transfer the workflow definitions and update any workflow subscriptions 3.Import the isolated region configurationdata using Process Configuration Console

- A. 3/1/2
- B. 3/2/1
- C. 2/1/3
- D. The tasks can be completed in any order.

Correct Answer: A

QUESTION 5

Which one of the following is NOT a function of the FileNet Process Configuration Console?

- A. Configure workflow subscriptions.
- B. Configure the event logs.
- C. Configure component queues.
- D. Configure work queues.

Correct Answer: A
