QUESTION 1

An IBM FileNet Administrator is deploying an application from a source environment to a destination environment for the first time. To do this, the administrator must perform several steps to set up the deployment configuration and define the relationship between the two environments. Which one of the following is NOT a step in this process?

- A. Set up the pair definition.
- B. Set up the converted queue definition.
- C. Set up the source environment definition, then define the connection to the source environment, setting the URL of the source Content Engine from which you will export objects.
- D. Set up the destination environment definition, then define the connection to the destination environment, setting the URL of the destination Content Engine to which you will import objects.

Correct Answer: B

QUESTION 2

Before you install IBM FileNet Content Platform Engine(CPE) 5.2, on DB2 or Oracle, how many databases will you recommend as a best practice?

- A. Two separate databases each with a separate tablespace.
- B. Three separate databases. One for the GCD, one for Content, and one for the 1st Object Store.
- C. One database.
- D. Four separate databases. One for the GCD, one for Content, one for the 1st Object Store, and one for a Fixed Content Device.

Correct Answer: A

QUESTION 3
