#### QUESTION 1

What is the purpose of the tiebreaker disk in a DB2 pureScale environment?

- A. Tiebreaker is used to determine which half of the DB2 pureScale instance should remain online upon a communication failure.
- B. Tiebreaker is used to determine which clients are accessing the data on the storage.
- C. Tiebreaker is used to determine which databases are currently active and can be accessed by the clients directly in graphical user interface (GUI).
- D. Tiebreaker is used by DB2 to transfer data when packets collide.

Correct Answer: A

---

#### QUESTION 2

Which of the following options best describes the differences between Label Based Access Control (LBAC) and Row and Column Access Control (RCAC)?

- A. RCAC is a fixed label security model designed for the US government while LBAC is a general purpose security model best suited for commercial customers.
- B. RCAC returns the data based on what is being asked (data centric), while LBAC returns data based on who is asking what (user centric). Users with DATAACCESS authority are exempt from the Row and Column Access Control rules.
- C. LBAC allows you to protect access only to rows, while RCAC allows you to protect both rows and columns.
- D. With RCAC users do not get an error when accessing protected data, while with LBAC users can get an error if they don't have the necessary credentials to access a LBAC protected column.

Correct Answer: D

---

#### QUESTION 3

What are some of the benefits of DB2 Express?

- A. DB2 Express has affordable licensing terms with all of the core features of the DB2 engine.
- B. DB2 Express is designed for development and testing. It is not used as a production database.
- C. DB2 Express is fastest and most powerful DB2 edition.
- D. DB2 Express is a tool that allows DBAs to quickly solve complex database issues.

Correct Answer: A

---

#### QUESTION 4

How are client connections handled in a standard DB2 pureScale environment?

- A. Connections must be directed to the primary cluster caching facility in the system.
- B. Connections must be directed to the shared storage.
- C. Connections must be directed to all members in the system, so that all members stay in sync.
- D. Connections can be directed to any of the members in the system.

Correct Answer: D

---

**QUESTION 5**

Which of the following is NOT valid state for the Cluster Caching Facility?

- A. ONLINE
- B. PRIMARY
- C. ERROR
- D. PEER

Correct Answer: A
