QUESTION 1

The table "t1" is defined below.

The column "id" for table "t1" is of INTEGER type.

id | name

----+-----1 | mammoth

2 | tortoise

3 | coelacanth

The following SQL statements were executed. Select the correct statement about the execution result.

BEGIN;

DECLARE c SCROLL CURSOR FOR SELECT name FROM t1 ORDER BY id; MOVE FORWARD 2
FROM c;

FETCH FORWARD ALL FROM c; COMMIT;

- A. The number of rows returned by the FETCH statement is 0.
- B. The number of rows returned by the FETCH statement is 1.
- C. The number of rows returned by the FETCH statement is 2.
- D. The number of rows returned by the FETCH statement is 3.
- E. An error occurs part way through.

Correct Answer: B

QUESTION 2

Select two correct statements that describe what occurs on the client side when the following command is executed.

pg_ctl -m smart stop

- A. Clients will not be able to make new connections.
- B. The running transaction for a connected client is rolled back and the connection is disconnected forcibly.
- C. Connections are terminated after the currently running transactions have finished.
- D. The processes of currently connected clients are processed normally.
- E. Connected clients receive a message saying that the server will soon be shutdown.

Correct Answer: AD

QUESTION 3

Based on the relationship of columns within a table, select the most suitable description that shows that column A is dependent on column B.

- A. The value in column B is uniquely determined when a value in column A is selected.
- B. The value in column A is uniquely determined when a value in column B is selected.
- C. When the value in column A is changed, the corresponding value in column B also must be changed.
- D. When the value in column B is changed, the corresponding value of column A also must be changed.
- E. As long as column B exists, the amount of information will not decrease even if column A is deleted.

Correct Answer: B

QUESTION 4

Select the most suitable statement about the PostgreSQL license from below.

- A. PostgreSQL is distributed under the GPL license.
- B. PostgreSQL is distributed under the PostgreSQL license.
- C. PostgreSQL is distributed under the LGPL license.
- D. PostgreSQL is distributed under the BSD license.
- E. PostgreSQL is distributed under the X11(MIT) license.

Correct Answer: D

QUESTION 5

Select one incorrect statement about the command shown below. Note: \$ is the command prompt. \$ dropuser -U admin foo

- A. If there is a database owned by foo, an error will occur.
- B. If admin is not the owner of foo, an error will occur.
- C. If admin doesn't have the superuser privilege, an error will occur.
- D. The user admin is removing the user foo.
- E. The same process can be performed using the SQL command "DROP USER".

Correct Answer: B
