QUESTION 1

Manufacturers design hardware used for wireless LANs based on a common set of criteria or rules known as standards. The name of the organization responsible for creating 802.11 WLAN standards is what?

- A. IEEE
- B. Wi-Fi Alliance
- C. IETF
- D. WiMAX Forum
- E. ITU

Correct Answer: A

QUESTION 2

What is one difference between autonomous access points and controller-based access points?

- A. Controller-based access points can be centrally managed, but autonomous access points cannot.
- B. Controller-based access points support client roaming, but autonomous access points do not.
- C. Controller-based access points cannot be configured on an individual basis, but autonomous access points can.
- D. Controller-based access points associate to a WLAN controller, but autonomous access points do not.

Correct Answer: D

QUESTION 3

Which Wi-Fi vertical market applications are regulated by a government or industry group for security compliance? (Choose 2)

- A. Patient records in hospitals
- B. Guest Internet services in coffee shops
- C. Inventory management in warehouses
- D. Location services on cargo ships
- E. Consumer payment information in retail stores

Correct Answer: AE

QUESTION 4

ABC Company is comprised of four departments: sales, marketing, engineering, and accounting. The company would like to separate the users on the WLAN so that users from different departments have access to different services on the network. To implement this strategy, you recommend a WLAN controller that supports _____.

- A. Role Based Access Control (RBAC)
- B. Preshared Key (PSK)
- C. Extended Service Set Identifiers (ESSIDs)
- D. Multiple Input Multiple Output (MIMO)
- E. Wireless Intrusion Protection System (WIPS)

Correct Answer: A

QUESTION 5

As a new salesperson for ABC Company's Golden Gate division, you are tasked with selling Wi-Fi equipment. While evaluating the manufacturer's specifications for a specific Wi-Fi device, you read that this device supports 802.1X/EAP. What capability does this feature provide?

- A. QoS for multimedia applications
- B. Power Save functionality
- C. Air Time Fairness
- D. User identity validation

Correct Answer: D
