QUESTION 1

How can a designer display the field selections that have been made within a chart caption?

- A. by inserting a Current selections box into the Text in Chart
- B. by using an expression with GetCurrentselections in the Window Title option on the General tab
- C. by using an expression with SET Analysis and the system Fields in the Title Text option on the Caption tab
- D. by selecting show Current selections on the Caption tab

Correct Answer: B

QUESTION 2

Which technique should a developer use to clearly describe dimensions and measures for end users who need to use collaborative objects?

- A. add field metadata tags to fields in the load script
- B. put a How To sheet in the application
- C. put descriptive information in each object's help text
- D. add a system table to the application

Correct Answer: A

QUESTION 3

A customer needs a better understanding of inventory trends over time. However, the source database contains only the current product inventory levels.

Which technique will take advantage of QlikView capabilities to meet the customer's needs?

- A. using a QlikView script to store an accumulation of periodic snapshots to a table in the source database
- B. using a QVD file to store an accumulation of periodic snapshots from the source database
- C. using a QVX file to store an accumulation of periodic snapshots from the source database
- D. using a QlikView script to store an accumulation of periodic snapshots to an XML file

Correct Answer: B

QUESTION 4

A designer needs to create a chart displaying the number of patients currently checked into a hospital by

age group.

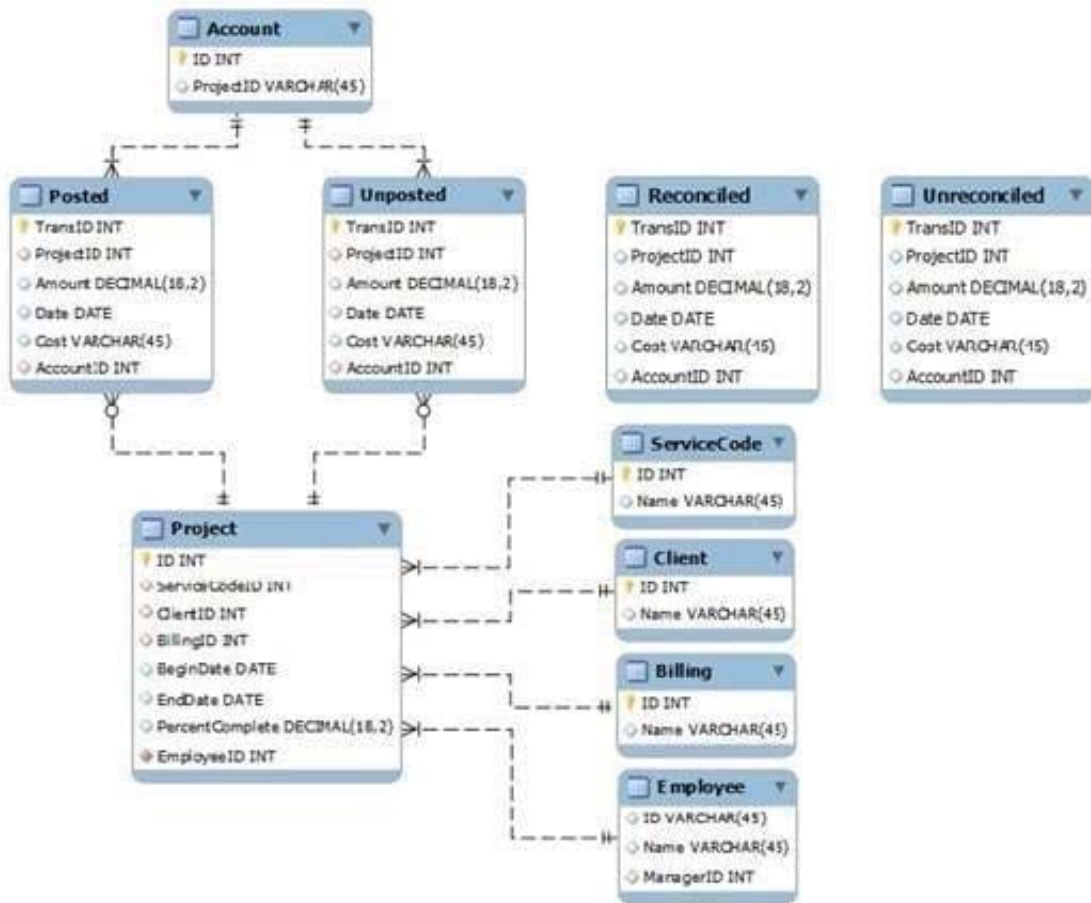

What is the appropriate Dimension for the chart?

- A. number of patients
- B. checked-in status
- C. hospital
- D. age group

Correct Answer: D

QUESTION 5

Refer to the exhibit.

A customer needs to analyze transactions across the Dimensions and Metrics identified below.

Required Dimensions:

Project ID

Month

Year Account ID Transaction Type Client ID Required Metrics: Number of transactions Total Amount Total Cost Average Amount Average Cost

Which approach will provide the most effective QlikView data model to meet the customer's requirements while optimizing performance and maintaining accuracy?

- A. build a Link Table to connect the four transaction tables and add a summary table with pre-calculated counts, totals, and averages
- B. build a Link Table to connect the four transaction tables and alias fields that must be kept in their respective table
- C. concatenate the four transaction tables and add a summary table with pre-calculated counts, totals, and averages
- D. concatenate the four transaction tables and add fields to identify the record type and count flag
- E. keep the four transaction tables separate and qualify the names to control correct linkage

Correct Answer: D
