Correct Answer: AC

QUESTION 3

What is the interpretation of a 98 percent subset ratio in the CustomerID field in an Orders table when the subset ratio of

![Pass2Lead](https://Pass2Lead.com)
the same field in the Customer table is 100 percent?

A. 98 percent of the orders have customers in the data, but only 2 percent of the orders have been shipped

B. 2 percent of the orders have customers in the data, but 100 percent of the customers have placed an order

C. 100 percent of customers are defined in the Customer table, but 2 percent of the customers have not placed an order

D. 98 percent of the customers are defined in the Customer table, but 2 percent of the customers have not placed an order

Correct Answer: C

QUESTION 4

An Address Book table has a Country Code field. A standard lookup table exists in Excel to translate the

Country Code to a Country description.

The Country Code will be US for any Address Book record with no Country Code value.

Which technique should a developer use to ensure a Country description is loaded for all Address Book

records?

A. load the Address Book records and perform a Left Join of the Excel data to the Address Book table

B. load the Excel data and then load the Address Book data ensuring the Country Code field has the same name in both tables

C. load the Excel data as a Mapping table and use Applymap with a default mapping value when loading the Address Booktable

D. load the Excel data, then load the Address Book data using an If function to default Country Code to US, and then use the Peek function to retrieve the Country description

Correct Answer: C

QUESTION 5

A developer needs to load an Account table and a Contact table from QVDs. The developer needs to load

only contacts for the accounts that have already been loaded.

There may be more than one contact for an account, so the developer needs to keep the Account and

Contact tables separate.

After loading the Account table, which function should the developer use in the Where clause of the

Contact table load?

A. Previous

B. Match

C. Exists

D. In

Correct Answer: C
