QUESTION 1

Your IT director had asked about the types of infrastructure platforms that vCloud Automation Center can deliver services across. Which three platform types will you include in your response? (Choose three.)

A. Cloud

B. Provider

C. Physical

D. Organization

E. Virtual

Correct Answer: ACE

QUESTION 2

Before you begin the rollout of your private cloud, the technical project leader wants to ensure you have the vSphere components required by vCloud Director in place first. Which two vSphere components are required by vCloud? (Choose two.)

A. ESXi hypervisor

B. vCenter Server

C. vSphere Data Protection

D. vCenter Orchestrator

Correct Answer: AB

QUESTION 3

Your customer needs to simplify network service deployment and reduce the amount of time spent configuring their existing physical network infrastructure. How will VMware NSX help your customer achieve these goals?

A. VMware NSX only utilizes virtual switches. The customer will have to install and configure physical switches to carry virtual switch traffic.

B. VMware NSX provisions virtual ESXI servers to bypass the need for configuring the physical switching infrastructure.

C. VMware NSX provisions network services in software, removing the need to configure the physical network infrastructure.

D. VMware NSX removes the need for physical switches, reducing deployment time.

Correct Answer: A

QUESTION 4

Your manager asks you to explain the relationship between vCloud Director and vSphere. How do you explain this to him?

A. vCloud does not leverage ESXi or vCenter

B. vCloud leverages ESXi, but not vCenter

C. vCloud leverages ESXi and vCenter

D. vCloud leverages vCenter, but not ESXi

Correct Answer: C

vCloud leverages ESXi and vCenter (vCenter is required to administrate your virtual infrastructure, certain tasks will have to be done first in vCenter, such as creating a HA/DRS cluster, configuring the distributed virtual switch, adding hosts, etc. vCloud Director will talk to your vCenter servers. To create a cloud you\\'ll need both vCenter and vCD.)

QUESTION 5

You have just been hired to oversee the rollout of a cloud environment at your new company. You decide to build two clouds: One for development and test and the other for production. Which product will allow you to move the workloads from the development cloud to the production cloud?

A. vFabric Suite

B. vCloud Connector

C. vCloud Networking and Security

D. vCloud Director

Correct Answer: B
