**QUESTION 1**

A software vendor-provided best practice should be adhered to \_\_\_\_\_. (Choose two)

- A. where possible, respecting other project requirements
- B. at all times because the vendor wrote and designed the software
- C. in the absence of other requirements as a guide to configuration

Correct Answer: AC

---

**QUESTION 2**

When using VMware HA, the larger the consolidation ratio, the smaller the potential impact to the business in the event of a VMware HA event.

- A. True
- B. False

Correct Answer: B

---

**QUESTION 3**

Storage DRS can be enabled and can balance I/O levels based on \_\_\_\_\_

- A. real-time stats
- B. historical stats

Correct Answer: B

---

**QUESTION 4**

You are designing a VMware HA cluster as part of a solution for a large enterprise. One of the specific requirements is to remove the risk of impact to a DRS outage due to possible fragmentation of resources leading to performance issues. Which of the following statements is correct?

- A. VMware HA will automatically protect DRS in the event of a HA event.
- B. A virtual vCenter cannot be used in this solution.
- C. vCenter heartbeat would need to be implemented to protect the vCenter and dependent services DRS uses for this level of protection.

Correct Answer: C

---

**QUESTION 5**

You are working on a virtual guest design for the deployment of a critical business application. The software vendor has provided you with some projected workloads. One of the project requirements is to ensure that business application performance is guaranteed. Which of the following would be the best approach for guest configuration?

- A. Configure the virtual guest with a reservation, as specified, as the minimum requirement for the application to run.
- B. Configure the virtual guest with a reservation, as specified, as the projected initial workload requirement.

Correct Answer: B
