QUESTION 5

Which of the following statements is wrong when comparing RDS with self-built database?

A. RDS features a high availability of 99.95% while self-built database requires you to implement data protection, primary-standby replication, and RAID all by yourself.

B. RDS provides automatic backup while self-built database requires you to prepare storage space for backup copies and regularly verify that these copies can be restored.

C. Self-built database supports quick deployment and elastic scaling.

D. RDS requires no OandM while self-built database requires a dedicated DBA for maintenance, which results in high HR cost.

Correct Answer: C
