QUESTION 1

A developer is trying to update the existing translation_rules.xml to update some translation rules on a node (node_X). In a nodelist element, the developer finds multiple rules targeting the same node (node_X). The developer then adds the new rule at the bottom of the list.

What is the outcome with this new rule introduced?

- A. This newly introduced rule overwrites translation rules.
- B. An error occurs when the translation rules try to be used on the node.
- C. The translation rules stay unchanged because the first rule on a node is always used.
- D. A warning message indicates that translation behavior will be unpredictable.

Correct Answer: C

QUESTION 2

Company XYZ has multiple AEM sites but would like only one of the sites to use a custom metadata schema. They would like to add a '\\verifiedBy\\' user picker field for its image assets. What do you need to do to implement this requirement?

- A. Create a new metadata schema and extend the Granite UI Component to create a new user picker field
- B. Customize the /default/image metadata schema and extend the Granite UI component to create a new user picker field
- C. Customize the existing /default metadata schema, add a Dropdown form field and manually add the users and groups to the list
- D. Create a new metadata schema, add a Dropdown form field and manually add the users and groups to the list

Correct Answer: A

QUESTION 3

A company uploaded several images that represent products, and each product is associated with a unique SKU number. The product owner would like the ability to search for multiple products by SKU number. What two steps must be completed to do this? (Choose two.)

- A. Customize the Assets Admin Search rail to include a Single Property Predicate and configure the property name to the SKU number
- B. Customize the image metadata schema and add a new Multi Value Text field for the SKU number

- C. Customize the Assets Admin Search rail to include a Multi Value Property Predicate and configure the property name to the SKU number
- D. Customize the image metadata schema and add a new Single Line Text field for the SKU number

Correct Answer: BC

QUESTION 4

All assets a client has have XMP metadata applied. The client would like to capture this metadata in AEM at the time of the upload. Which would you recommend as a workflow strategy to accomplish this task?

- A. Implement a workflow process to extract the relevant metadata and save it as tags. Modify the DAM Update Asset workflow model to include this workflow process.
- B. Modify the DAM Update Asset workflow model to include the Extract Meta Data process.
- C. Create a new workflow model that includes the Extract Meta Data process, and run this workflow on the desired assets.
- D. Implement a workflow process to extract the relevant metadata and save it as tags. Create a new workflow model that includes this process and run this workflow on the desired assets.

Correct Answer: A

QUESTION 5

The OSGi configuration of `com.day.cq.dam.core.impl.mimeType.AssetUploadRestrictionHelper` is as shown:

```
jc:primaryType="sling:OsgiConfig" cq.dam.allow.all.mime="{Boolean}true"/>
```

A developer uploads a PDF document, a JPEG image, and an SVG file to the DAM.

What is the result?

- A. All three assets upload.
- B. Only the JPEG and SVG files upload. The PDF file is restricted.
- C. All three assets upload but the PDF document does NOT have a generated thumbnail.
- D. Only the JPEG file uploads. The PDF and SVG files are restricted.

Correct Answer: A
