QUESTION 1

You need to get code with a backend order placement security related fix into production as quickly as possible.

The project currently deploys static content during the build phase with both stags/global/SKIP_SCD and stage/deploy/STATIC_STATIC_CONTENT_SYMLINK set to false.

What setting in .magento.env.yaml minimizes the overall deployment time?

- A. Remove all themes from stages/global/SCD_MATRIX so they will not be generated
- B. Set stage/global/Static_CONTENT_SYMLINK to true to symlink static assets to the init directory
- C. Set stage/global/SCD_COMPRESSION_LEVEL to 0 to avoid the compression overhead
- D. Set stage/global/SKIP_SCD to true to completely avoid static content processing

Correct Answer: B

QUESTION 2

You are working with a new developer who needs to be able to deploy code and view logs on MagentoCommerce Cloud 60.

What must you do to give them access?

- A. In the .magento.app.yaml file, add their email under Users. They need to enter their SSH public key.
- B. Add their SSH public key to a file named .ssh/authorized_keys and deploy the change.
- C. In the Cloud Project Web UI, click Add User to add their email. They need to enter their SSH public key.
- D. Add a Magento admin user for them and paste the SSH public key into their user's SSH Key field, which is available only on Magento Commerce Cloud

Correct Answer: C

QUESTION 3

Your client is expecting a five-day sale where the traffic will approximately double. Your instance is consuming all available resources on all three nodes so upsizing one level is appropriate.

How many upsize days will this event use?

- A. Five
- B. Eight
- C. Ten
- D. Fifteen

Correct Answer: A

QUESTION 4

Your team is working on two major changes affecting the product page and you want the ability to implement and test these changes in parallel. Your company is using the Pro plan.

How do you achieve this using the Project Web UI?

- A. Create branches from Production to ensure the catalog is up to date
- B. Create branches from Integration to facilitate merging
- C. Create branches from the Magento Cloud Docker image to ensure the changes are made on the most recent codebase
- D. Create branches from Staging to ensure the changes are tested on an environment similar to Production

Correct Answer: A

QUESTION 5

You want to exclude some themes from static assets generation only for integration environments. You are trying to choose where to set the `scd_exclude_themes` variable in the `.magento.env.yaml` file or in the Project Web UI.

What prevents the usage of the `.magento.env.yaml` file?

- A. Child environments inherit the variable when you use the `.magento.env.yaml` file
- B. The code from integration would be merged into the Staging and Production branches
- C. The `.magento.env.yaml` file can contain only deployment configuration options, which are only available if static assets generation runs on the deploy phase
- D. Only variables which are set using the Project Web UI have the option visible during build

Correct Answer: B
