**QUESTION 1**

You are starting to review some of the incident reports that have been submitted as a result of test execution.

| Description | Strange tab behaviour and wrong error message | Date | 12 August 2009 |
|---|---|---|---|
| Tester | Mr. Bug | Priority | Medium |
| Test case ID | 02.05 | Severity | Low |

Which THREE of the comments would be your main findings when you have reviewed the following incident report? [K4] 3 credits, 2 out of 3 correct 1 credit

A. Should have been two defect reports

B. Ambiguous description

C. Both severity and priority do not make sense

D. Actual cause is missing

E. Reproducibility is not indicated

F. Defect type is missing

G. Date to be fixed not defined

Correct Answer: ABE

**QUESTION 2**

A new banking system has 2 customers\\' types, 2 account types and will operate in two different countries How many test cases will be needed using the pair wise testing technique and the appropriate 2-wise orthogonal array? [K3] 3 credits

A. 2

B. 4

C. 5

D. 8

Correct Answer: B

**QUESTION 3**

Ken, an entrepreneur in Leeds finds the quality of the tea locally available so low, that he decides to research superior teas around the world. He decides to market, sell and distribute these superior teas via the web. His market strategy is to offer superior products on a well-designed website with graphics that are fast to load, has high availability, superior usability and fast response times. The website will offer the following: -An innovative interactive catalogue of teas, which not only enables customers to buy the product, but also enables them to provide feedback by rating the teas (which will influence his stock purchasing levels) Provide the customer with the ability to use secure credit card transactions Provide the customer to give

general feedback

Ken selects an iterative model for the development of the prototypes. The team consists of three

developers that are experienced in web development. Ken, although he doesn\\'t have technical skillset, is

concerned with quality. He doesn\\'t believe a lot of documentation is necessary and he wants the website

to be completed quickly.

The test basis contains the following:

-Story boards that show the information flow and page links through the site -HTML pages developed to

date.

-A statement of non-functional requirements.

With the strategy taking shape, Ken asks your advice on the specific testing techniques that should be

used to complete the required testing, bearing in mind the nature of the application and the nature of Ken\\'s
overall objectives.

We now make the assumption that in the scenario described as above, exploratory testing was selected as

being the main test technique. You have now been given the task of specifying, executing and recording

the exploratory test sessions. Select TWO of the options below to define what you will typically use for

specifying, executing and recording the sessions? [K3] 2 credits

A. Record the results in email and send the email to the test manager.

B. Use external testers on the team to provide a new approach and fresh view to the testing effort.

C. Create test charters for planned test session.

D. Use debriefing sessions with stakeholders and other testers to discuss the findings and new risks identified.

E. Define concrete test cases to be executed by the developers.

Correct Answer: CD

**QUESTION 4**

A SUMI test was performed at an early stage within the system test. Hereafter you find the results of the SUMI test.

Based on these results, what would you recommend as the most appropriate approach for usability testing? [K4] 3 credits

A. Since the SUMI scores are largely above market average no further action on usability is needed

B. Since the standard deviation of most SUMI scales is much too large, a new SUMI test must be performed

C. Since the scores are not really showing a high level of user-satisfaction additional usability testing based on use case is needed

D. Since the SUMI results do not provide details, an additional focused heuristic evaluation on the lower scales is recommended

Correct Answer: D

**QUESTION 5**

Which of the following is the LEAST appropriate action to mitigate product risks for a web application? [K3] 2 credits

A. Initiate reviews of test design

B. Use professional and skilled testers with appropriate technical knowledge

C. Run tests in multiple operational environments

D. Allocate more time to high risk areas

Correct Answer: A
