**QUESTION 1**

**HOTSPOT**

You need to recommend a solution for App1. The solution must meet the technical requirements. What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Number of virtual networks:

1
2
3

Number of subnets per virtual network:

1
2
3

Correct Answer:

### Answer Area

Number of virtual networks:

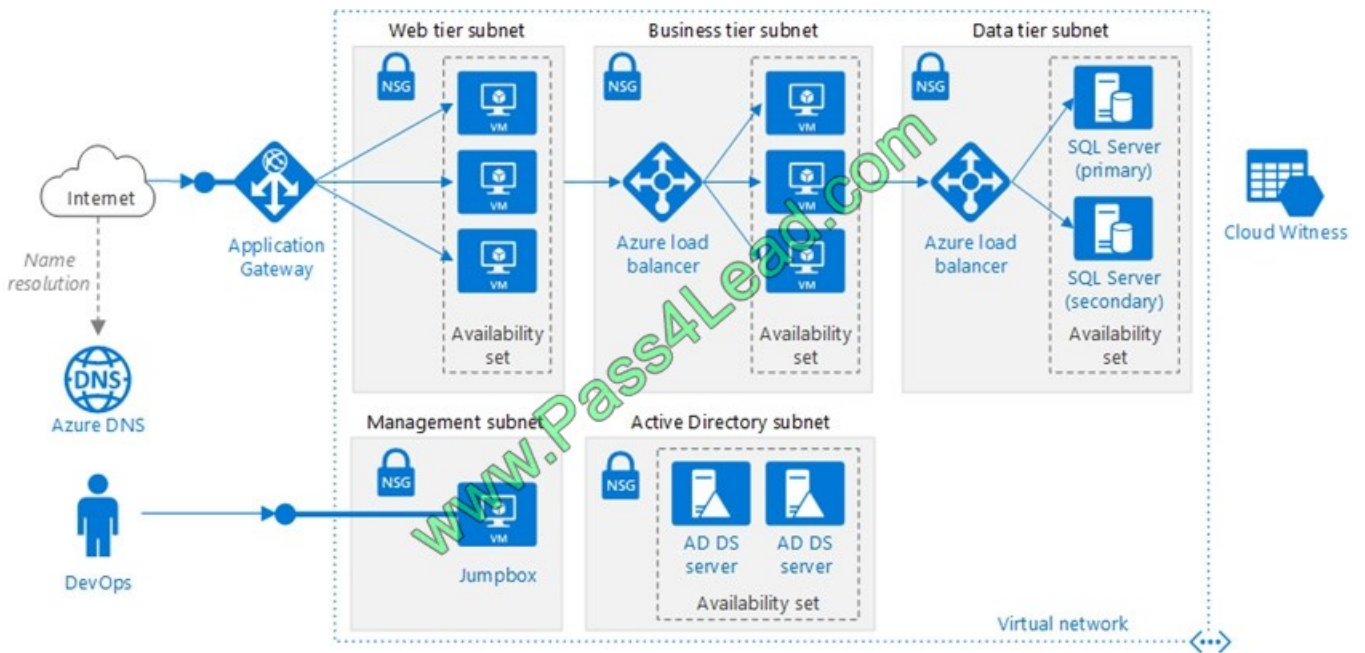

- 1
- 2
- 3

Number of subnets per virtual network:

- 1
- 2
- 3

Explanation:

This reference architecture shows how to deploy VMs and a virtual network configured for an N-tier application, using SQL Server on Windows for the data tier.

Scenario: You have a public-facing application named App1. App1 is comprised of the following three tiers:

- A SQL database
- A web front end
- A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Technical requirements include:

Move all the virtual machines for App1 to Azure.

Minimize the number of open ports between the App1 tiers.

References: <https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/n-tier/n-tier-sql-server>

## QUESTION 2

### HOTSPOT

You have an Azure subscription named Subscription1 that is associated to an Azure Active Directory (Azure AD) tenant named AAD1.

Subscription1 contains the objects in the following table:

Name	Type
Share1	Azure file share
Account1	Azure Storage account
RG1	Resource group
Vault1	Recovery Services vault

You plan to create a single backup policy for Vault1. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

.....

#### Answer Area

You can create an Azure backup policy for:

AAD1 only
Account1 only
RG1 only
Share1 only
AAD1 and Share1 only
AAD1, Share1 and Account1 only
AAD1, Share1, Account1, and RG1

In the backup policy that you create, you can configure the backup to be retained for up to:

7 days
31 days
90 days
120 days
365 days
99 years

Correct Answer:

Answer Area

You can create an Azure backup policy for:

- AAD1 only
- Account1 only
- RG1 only
- Share1 only
- AAD1 and Share1 only
- AAD1, Share1 and Account1 only
- AAD1, Share1, Account1, and RG1

In the backup policy that you create, you can configure the backups to be retained for up to:

- 7 days
- 31 days
- 90 days
- 120 days
- 365 days
- 99 years

Explanation:

Box 1: RG1 only

Box 2: 99 years

With the latest update to Azure Backup, customers can retain their data for up to 99 years in Azure.

Note: A backup policy defines a matrix of when the data snapshots are taken, and how long those snapshots are retained.

The backup policy interface looks like this:

\* Policy name

Backup frequency  
Daily 5:30 AM Local Time (UTC-07:00)

Retention range

Retention of daily backup point.

\* At 5:30 AM For 180 Day(s)

Retention of weekly backup point.

\* On Sunday \* At 5:30 AM For 104 Week(s)

Retention of monthly backup point.

Week Based Day Based

\* On First \* Day Sunday \* At 5:30 AM For 60 Month(s)

Retention of yearly backup point.

Week Based Day Based

\* In January \* On First \* Day Sunday \* At 5:30 AM For 10 Year(s)

**QUESTION 3**

You have an Azure subscription named Subscription1.

You have 5 TB of data that you need to transfer to Subscription1.

You plan to use an Azure Import/Export job.

What can you use as the destination of the imported data?

- A. Azure SQL Database
- B. Azure Data Factory
- C. A virtual machine
- D. Azure Blob storage

Correct Answer: D

Azure Import/Export service is used to securely import large amounts of data to Azure Blob storage and Azure Files by shipping disk drives to an Azure datacenter.

References: <https://docs.microsoft.com/en-us/azure/storage/common/storage-import-export-service>

#### QUESTION 4

You have an Azure subscription named Subscription1. Subscription1 contains the resource groups in the following table.

Name	Azure region	Policy
RG1	West Europe	Policy1
RG2	North Europe	Policy2
RG3	France Central	Policy3

RG1 has a web app named WebApp1. WebApp1 is located in West Europe.

You move WebApp1 to RG2.

What is the effect of the move?

- A. The App Service plan for WebApp1 moves to North Europe. Policy2 applies to WebApp1.
- B. The App Service plan for WebApp1 moves to North Europe. Policy1 applies to WebApp1.
- C. The App Service plan for WebApp1 remains in West Europe. Policy2 applies to WebApp1.
- D. The App Service plan for WebApp1 remains in West Europe. Policy1 applies to WebApp1.

Correct Answer: C

You can move an app to another App Service plan, as long as the source plan and the target plan are in the same resource group and geographical region. The region in which your app runs is the region of the App Service plan it's in. However, you cannot change an App Service plan's region.

---

### QUESTION 5

You have the Azure virtual machines shown in the following table.

Name	Azure region
VM1	West Europe
VM2	West Europe
VM3	North Europe
VM4	North Europe

You have a Recovery Services vault that protects VM1 and VM2. You need to protect VM3 and VM4 by using Recovery Services. What should you do first?

- A. Configure the extensions for VM3 and VM4.
- B. Create a new Recovery Services vault.
- C. Create a storage account.
- D. Create a new backup policy.

Correct Answer: B

A Recovery Services vault is a storage entity in Azure that houses data. The data is typically copies of data, or configuration information for virtual machines (VMs), workloads, servers, or workstations. You can use Recovery Services vaults to hold backup data for various Azure services
