QUESTION 1

DRAG DROP

You are developing an online order website that uses Azure Durable Functions- You develop the following processes for the website:

Process	Requirements
Add items to the shopping cart.	<ul style="list-style-type: none"> Check inventory to see if an item is in stock. If the item is in stock, add the item to the cart. If the item is not in stock, display a message to the user.
Delete items from the shopping cart.	<ul style="list-style-type: none"> If the item count is greater than zero, display a warning message to the user. If the user selects the continue option, decrease the item count in the cart and refresh the display of the cart. If the user selects the cancel operation, display the cart. If the item count is zero, remove the item from the cart.
Complete checkout processes.	<ul style="list-style-type: none"> Collect order information, including quantities and shipment method. Collect billing information. Collect shipping information. Finalize the purchase.

You need to identify what types of functions to use for each step of the process.

Which function types should you use? To answer, drag the appropriate function types to the correct operations. Each function type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Correct Answer:

QUESTION 2

You need to resolve the chatbot issue. What should you do?

- A. Update the bot to store and retrieve state data;
- B. Update the bot to overload the Dialog class constructor and invoke the root dialog.
- C. Update the bot to pass native metadata to a channel in the Activity object's Channel Data property.
- D. Use the Bot Framework Connector to send and receive activities.

Correct Answer: A

QUESTION 3

DRAG DROP

You are developing a .NET Core Web Job that is triggered by an Azure Storage Queue.

The project uses dependency injection from the NuGet package Microsoft.Extensions.DependencyInjection. The Webjob logic is contained in the Worker class. The program.cs file contains the following code:

```
static void Main()
{
    var sc = new ServiceCollection();
    sc.AddSingleton<Worker>();
    var sp = sc.BuildServiceProvider();
    var jobHostConfig = new JobHostConfiguration()
    {
        JobActivator = new Helper(sp),
    };
    var host = new JobHost(jobHostConfig);
    host.RunAndBlock();
}
```

You need to ensure that the Worker class can run when an Azure Storage Queue message arrives.

Which code segments should you use to complete the code? To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Select and Place:

Correct Answer:

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others

might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Margie's Travel is an international travel and bookings management service. The company is expanding into restaurant bookings. You are tasked with implementing Azure Search for the restaurants listed in their solution.

You create the index in Azure Search.

You need to import the restaurant data into the Azure Search service by using the Azure Search .NET SDK.

Solution:

1.

Create a SearchIndexClient object to connect to the search index.

2.

Create a DataContainer that contains the documents which must be added.

3.

Create a DataSource instance and set its Container property to the DataContainer.

4.

Call the Documents.Suggest method of the SearchIndexClient and pass the DataSource. Does the solution meet the goal?

A. No

B. Yes

Correct Answer: B

QUESTION 5

You need to ensure that the solution can meet the scaling requirements for Policy Service. Which Azure Application Insights data model should you use?

A. an Application Insightsmetric

B. an Application Insightsdependency

C. an Application Insightstrace

D. an Application Insightsevent

Correct Answer: D
