QUESTION 1

HOTSPOT

You have a virtual network named VNet1 that has the configuration shown in the following exhibit.

```
PS C:\> Get-AzureRmVirtualNetwork -Name Vnet1 -ResourceGroupName Production

Name                  : VNet1
ResourceGroupName     : Production
Location              : westus
Id                    : /subscriptions/14d26092-8e42-4ea7-b770-9dcef70fb1ea/resourceGroups/Production/providers/Micros
                        oft.Network/virtualNetworks/VNet1
Etag                  : W/"76f7edd6-d022-455b-aeae-376059318e5d"
ResourceGuid          : 562696cc-b2ba-4cc5-9619-0a735d6c34c7
ProvisioningState     : Succeeded
Tags                  :
AddressSpace          : {
                          "AddressPrefixes": [
                            "10.2.0.0/16"
                          ]
                        }
DhcpOptions           : {}
Subnets               : [
                          {
                            "Name": "default",
                            "Etag": "W/\"76f7edd6-d022-455b-aeae-376059318e5d\"",
                            "Id": "/subscriptions/14d26092-8e42-4ea7-b770-9dcef70fb1ea/resourceGroups/Production/provi
                        ders/Microsoft.Network/virtualNetworks/VNet1/subnets/default",
                            "AddressPrefix": "10.2.0.0/24",
                            "IpConfigurations": [],
                            "ResourceNavigationLinks": [],
                            "ServiceEndpoints": [],
                            "ProvisioningState": "Succeeded"
                          }
                        ]
VirtualNetworkPeerings : []
EnableDDoSProtection  : false
EnableVmProtection    : false
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Before a virtual machine on VNet1 can receive an IP address from 192.168.1.0/24, you must first **[answer choice]**.

add a network interface
add a subnet
add an address space
delete a subnet
delete an address space

Before a virtual machine on VNet1 can receive an IP address from 10.2.1.0/24, you must first **[answer choice]**.

add a network interface
add a subnet
add an address space
delete a subnet
delete an address space

Correct Answer:

Before a virtual machine on VNet1 can receive an IP address from 192.168.1.0/24, you must first [**answer choice**].

| add a network interface |
| add a subnet |
| **add an address space** |
| delete a subnet |
| delete an address space |

Before a virtual machine on VNet1 can receive an IP address from 10.2.1.0/24, you must first [**answer choice**].

| **add a network interface** |
| add a subnet |
| add an address space |
| delete a subnet |
| delete an address space |

Box 1: add an address space Your IaaS virtual machines (VMs) and PaaS role instances in a virtual network automatically receive a private IP address from a range that you specify, based on the address space of the subnet they are connected to. We need to add the 192.168.1.0/24 address space. Box 2: add a network interface The 10.2.1.0/24 network exists. We need to add a network interface. References: https://docs.microsoft.com/en-us/office365/enterprise/designing-networking-for-microsoft-azure-iaas https://docs.microsoft.com/en-us/azure/virtual-network/virtual-networks-static-private-ip-arm-pportal

QUESTION 2

Your company has 300 virtual machines hosted in a VMWare environment. The virtual machines vary in size and have various utilization levels.

You plan to move all the virtual machines to Azure.

You need to recommend how many and what size Azure virtual machines will be required to move the current workloads to Azure. The solution must minimize administrative effort.

What should you use to make the recommendation?

A. Azure Cost Management

B. Azure Migrate

C. Azure pricing calculator

D. Azure Advisor recommendations

Correct Answer: B

QUESTION 3

You need to recommend a solution for the network configuration of the front-end tier of the payment processing. What should you include in the recommendation?

A. Azure Application Gateway

B. Traffic Manager

C. a Standard Load Balancer

D. a Basic load Balancer

Correct Answer: B

QUESTION 4

You maintain an existing Azure SQL database instance. Management of the database is performed by an external party. All cryptographic keys are stored in an Azure Key Vault.

You must ensure that the external party cannot access the data in the SSN column of the Person table.

Will each protection method meet the requirement? To answer, drag the appropriate responses to the correct protection methods. Each response may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Responses	Answer Area	
	Protection method	**Response**
Yes	Enable AlwaysOn encryption.	Response
No	Set the column encryption setting to **disabled**.	Response
	Assign users to the **Public** fixed database role.	Response
	Store column encryption keys in the system catalog view in the database	Response

Correct Answer:

Responses	Answer Area	
	Protection method	**Response**
Yes	Enable AlwaysOn encryption.	Yes
No	Set the column encryption setting to **disabled.**	No
	Assign users to the **Public** fixed database role.	No
	Store column encryption keys in the system catalog view in the database	No

QUESTION 5

You have a web app named WebApp1 that uses an Azure App Service plan named Plan1. Plan1 uses the Dl pricing tier and has an instance count of 1. You need to ensure that all connections to WebApp1 use HTTPS. What should you do first?

A. Scale up Plan1.

B. Scale out Plan1.

C. Disable anonymous access to WebApp1.

D. Modify the connection strings for WebApp1.

Correct Answer: A
