QUESTION 1

You are designing a microservices architecture that will support a web application.

The solution must meet the following requirements:

1.

Allow independent upgrades to each microservice

2.

Deploy the solution on-premises and to Azure Set policies for performing automatic repairs to the microservices Support low-latency and hyper-scale operations You need to recommend a technology. What should you recommend?

A. Azure Service Fabric

B. Azure Container Service

C. Azure Container Instance

D. Azure Virtual Machine Scale Set

Correct Answer: A

<https://docs.microsoft.com/en-us/azure/service-fabric/service-fabric-overview>

QUESTION 2

You need to recommend a solution for the App1 maintenance task. The solution must minimize costs. What should you include in the recommendation?

A. an Azure logic app

B. an Azure function

C. an Azure virtual machine

D. an App Service WebJob

Correct Answer: B

<https://learn.microsoft.com/en-us/azure/azure-functions/functions-reference-powershell?tabs=portal>

<https://learn.microsoft.com/en-us/azure/azure-functions/functions-create-scheduled-function#create-a-timer-triggered-function>

QUESTION 3

Your company plans to use a separate Azure subscription for each of its business units. You identify the following governance requirements:

1.
Each business unit will analyze costs for different workloads such as production, development, and testing.
2.
The company will analyze costs by business unit and workload. What should you use to meet the governance requirements?
- A. Azure Advisor alerts and Azure Logic Apps
 - B. Microsoft Intune and compliance policies
 - C. Azure management groups and RBAC
 - D. tags and Azure Policy

Correct Answer: D

QUESTION 4

HOTSPOT

You have an Azure subscription that contains the storage accounts shown in the following table.

Name	Type	Performance
storage1	StorageV2	Standard
storage2	StorageV2	Premium
storage3	BlobStorage	Standard
storage4	FileStorage	Premium

You plan to implement two new apps that have the requirements shown in the following table.

Name	Requirement
App1	Use lifecycle management to migrate app data between storage tiers
App2	Store app data in an Azure file share

Which storage accounts should you recommend using for each app? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

App1:

	▼
Storage1 and storage2 only	
Storage1 and storage3 only	
Storage1, storage2, and storage3 only	
Storage1, storage2, storage3, and storage4	

App2:

	▼
Storage4 only	
Storage1 and storage4 only	
Storage1, storage2, and storage4 only	
Storage1, storage2, storage3, and storage4	

Correct Answer:

Answer Area

App1:

	▼
Storage1 and storage2 only	
Storage1 and storage3 only	
Storage1, storage2, and storage3 only	
Storage1, storage2, storage3, and storage4	

App2:

	▼
Storage4 only	
Storage1 and storage4 only	
Storage1, storage2, and storage4 only	
Storage1, storage2, storage3, and storage4	

QUESTION 5

Your network contains an Active Directory domain named contoso.com that is federated to an Azure Active Directory (Azure AD) tenant. The on-premises domain contains a VPN server named Server1 that runs Windows Server 2016.

You have a single on-premises location that uses an address space of 172.16.0.0/16.

You need to implement two-factor authentication for users who establish VPN connections to Server1.

What should you include in the implementation?

- A. In Azure AD, create a conditional access policy and a trusted named location
- B. Install and configure Azure MFA Server on-premises
- C. Configure an Active Directory Federation Services (AD FS) server on-premises
- D. In Azure AD, configure the authentication methods. From the multi-factor authentication (MFA) service settings, create a trusted IP range

Correct Answer: B

You need to download, install and configure the MFA Server.

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfaserver-deploy>
