100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by IBM Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

What kind of machine learning approach is typically used for classification with a neural network?

- A. automatic learning
- B. active learning
- C. supervised learning
- D. reinforcement learning

Correct Answer: C

QUESTION 2

When running an application on IBM Cloud that uses the IBM Watson assistant service, what is the prerequisite to use the service?

- A. That the Watson Assistant service credentials username and password are provisioned and referenced for the application.
- B. That the Watson Assistant service is associated with an IBM Watson speech to Text service.
- C. That the Watson Assistant service uses robust conversation collected from actual user questions.
- D. That the Watson Assistant service is bound to the application.

Correct Answer: D

QUESTION 3

Which two statements accurately describe file size management for IBM Watson Discovery service?

- A. Sample documents must be uploaded to a separate collection other than actual content.
- B. The maximum file size for a sample document is 1MB.
- C. The maximum file size for documents in a collection is 50MB.
- D. There is a limit of no more than 5 documents sample documents.
- E. Sample documents must be deleted before uploading documents to a collection.

Correct Answer: AC

QUESTION 4

Someone is training a machine learning system to perform classification of unstructured content. What is the purpose of a validation data set on the training process?

- A. Validation data sets are used to fine tune the accuracy of the training model
- B. Validation data sets are only used if test data is unavailable
- C. Validation data sets are exactly the same as test data sets and are used to test the limits of the machine learning model
- D. Validation data sets would never be used in a classification system as only training and test data are required

Correct Answer: C

QUESTION 5

Why would the data crawler be used with the IBM Watson Discovery service?

- A. When working with the tooling, the data crawler can be used to upload sample documents.
- B. The data crawler automates the upload of content to the Discovery Service.
- C. When there is a business need to dynamically crawl websites, Twitter and constantly changing content.
- D. Use the data crawler when structured data must be mined from other services.

Correct Answer: B
