QUESTION 1

Which component is only available in IBM BPM and not in IBM BPM Express?

A. Process Server

B. Process Portal

C. Case Management

D. IBM BPM messaging engine

Correct Answer: A

QUESTION 2

Administrators in a hospital use a web-based application when filling out new patient forms. They experience frequent web browser freezes or it becomes unresponsive for several seconds. This is due to large content of data with numerous sections and tables presented in a single page patient form. As part of refactoring the application, the BPM application developer is tasked to mitigate the performance impact of the new patient form page. What guidelines can the developer follow to improve the performance?

A. Add exit safeguard, collapsible panel in deferred section control, and add modal section with panel

B. Add tab section, change the rendering option of one or more table columns to seamless coach view, and add progress bar with navigation event

C. Contain coach views with in responsive sensor, add modal section, and change the rendering option of one or more table columns to simple html

D. Server side pagination of table data, contain complex coach view in a deferred section control, and enable async loading in horizontal/vertical layouts

Correct Answer: D

QUESTION 3

Which statement describes using a Service Call control from the BPM Ul toolkit to invoke a service flow?

A. It is used to invoke a service without having to use boundary events and has an input and output variable with on load, on invoked, on result, on error events. It can be placed in client side human service coach page or inside coach view.

B. A Service flow which has an input and output variable and a service task activity inside it calling an implementation service.

C. It is used to invoke a service that returns the data displayed in the table, never bound to variable, with on load, on service data loaded, on service data error events. It can be placed in client side human service coach page or inside coach view.

D. It is coupled with the human service in which it is used. It is created in the library area where User Interface library
