QUESTION 1

In a Data Module a developer creates a joined view from two tables (a and b) and then joins this to another table (c). What would be the execution logic in the database?

- A. All queries are collapsed and a standard join across all three tables (a, b, c) is performed.
- B. The columns used in table (c) are are joined on the key to table (b) first and then the results are post-joined to table (a).
- C. It makes no difference to the execution as a joined view is only used to group data items in a logical manner to help the business user find their data.
- D. The joined view (a and b) is evaluated and all results are then post-joined to the other table (c).

Correct Answer: D

QUESTION 2

To change the text item in a list column title or the data in the column body of a list object in a report, what first needs to happen?

- A. Select the cell and change the data format.
- B. Click on the Lock Page Objects icon to unlock the report.
- C. Select one of the cells and from the menu click Select Columns Style or Select Columns body style.
- D. Select the cell and change the Box Type to None.

Correct Answer: C

QUESTION 3

When a developer needs to share dashboard content with another application, the Share option provides which benefit?

- A. the ability to export the dashboard to Excel
- B. the ability to generate the HTML to create an iFrame and reference the dashboard
- C. the ability to export the dashboard directly to SharePoint.
- D. the ability to send a notification to a phone

Correct Answer: D

QUESTION 4

What is a Jupyter Notebook?

- A. An interface in Cognos Analytics that uses Cognos syntax to produce statistical and predictive model
- B. An open-source web application that allow you to create and share documents that contain live code, equations, visualizations and narrative text
- C. An area where the developer can comment on Cognos Analytics assets to help the end user and embedded AI understand what is available
- D. The core component used by Cognos Analytics for its AI in Intent based model, Nature Language processing and Explorations

Correct Answer: B

QUESTION 5

What is the significance of `\\Clothes\\` in the following filter expression of a report query? `[Product Group] = # sq(prompt(\\productgroups\\, \\token\\, \\Clothes\\))#`

- A. `\\Clothes\\` is the default text to include in the generated query at runtime.
- B. The string `\\Clothes\\` will precede the text of the prompt value selected at runtime.
- C. The string `\\Clothes\\` will be appended to the end of the text of the prompt value selected at runtime.
- D. `\\Clothes\\` is a required value to include in the generated query at runtime.

Correct Answer: C
