QUESTION 1

The ALTER BUFFERPOOL command specifying the AUTOSIZE(YES) option enables DB2 to use WLM services to fine tune the buffer pools.

What is the result of issuing this ALTER?

A. The immediate write threshold can be increased by 25%.

B. A pool size can be increased by up to 25% over original pool size.

C. The pool size can be increased in 25% increments base on sequential read hit ratio.

D. Depending on the type of I/O performed, pool size can be increased or decreased.

Correct Answer: B

QUESTION 2

You are facing a severe locking problem with a specific application using plan PLANB. To identify what is going on you need to start a detailed locking trace. However, you want to limit the scope of the trace somewhat to reduce the trace overhead and trace volume. (IFCID 21 traces each lock request and is part of performance trace class 7).

Which is the most appropriate command to use ?

A. -STA TRA(P) CLASS(7) DEST(GTF) PLAN(PLANB)

B. -STA TRA(P) CLASS(7) IFCID(21) DEST(GTF) PLAN(PLANB)

C. -STATRA(P)CLASS(30) IFCID(21) DEST(GTF) PLAN(PLANB)

D. -STA TRA(P) CLASS(7) IFCID(21) DEST(GTF) XPLAN(PLANB\\')

Correct Answer: B

QUESTION 3

You wish to enable automatic clean-up of committed pseudo-deleted index entries for all indexes in the DB2 subsystem. You have verified that system table SYSIBM.SYSINDEXCLEANUP has no rows.

Without taking any other action, which action will accomplish this?

A. Set subsystem parameter INDEX_CLEANUP_THREADS to 10.

B. Set subsystem parameter INDEX_CLEANUP_THREADS to YES.

C. Issue an ALTER INDEX statement against all indexes with ERASE YES.

D. Issue an ALTER INDEX statement against all indexes with FREEPAGE 0.

Correct Answer: A

QUESTION 4

You wish to set the maximum allocation of sort storage to 5000 kilobytes for a query that contains an ORDER BY clause.

Which action will accomplish this?

A. Set subsystem parameter MAXRBLK to 5000.

B. Set subsystem parameter MAXSORTJNJV1EMORY to 5000.

C. Issue command-ALTER BUFFERPOOL(BP7) VPSIZE(5000).

D. DB2 does not allow for user control of this maximum allocation.

Correct Answer: B

QUESTION 5

One of your applications is experiencing long elapsed times. You notice from DB2 accounting data that 90% of the class 2 elapsed time consists of class 3 suspension time.

Which statement describes the behavior of the application?

A. The application is the victim of excessive performance tracing.

B. The application spends the majority of its time waiting on the network.

C. The application contains complex SQL statements that are CPU intensive.

D. The application spends the majority of its time waiting for buffer pool I/O and log I/O.

Correct Answer: C
