- B. set the startup type to automatic
- C. set the login as a system local account
- D. set the login as an account with appropriate permissions

Correct Answer: D

---

**QUESTION 3**

Why would an IBM Tivoli Endpoint Manager (TEM) administrator use the task relay setting Name Override?

- A. to provide an alternate domain name for the agent connections to a relay
- B. to have the relay report a different name to the server to avoid name collision with another relay
- C. to have the relay display a different name in the TEM Console than its default name so it can be grouped with other relays
- D. to have the relay use a different domain name so it can be part of a Managed Service Point segmented customer environment

Correct Answer: A

---

**QUESTION 4**

How can the default cost assumptions in the Power Management for cost per kWh be changed to match a specific environment?

- A. use the Default Power Analysis Fixlet
- B. use the Power Profile Deployment Wizard
- C. use the Power Management Configuration Wizard
- D. use the Manage Custom Assumptions Tasks Wizard

Correct Answer: D

---

#### QUESTION 5

What is the major consumer of network bandwidth by IBM Tivoli Endpoint Manager V8.1 (TEM) for Lifecycle Management?

- A. The updates to each subscribed site for each TEM Agent.
- B. The heartbeat packets sent by a TEM Agent to the TEM Server.
- C. The downloading of files for patching or software installations on the TEM Agent.
- D. The use of ICMP pings by the TEM Agent when Automatic Relay Selection is enabled.

Correct Answer: C
