QUESTION 3

A report developer is tasked to create a drill-through definition in a report.

Which are the generalized steps?

- A. Create the target report> Add parameter to target report> Save the target report> Set drill-through behavior
- B. Set drill-through behavior on each report> Select the correct package> Map parameter values passed to target report> Define source report
- C. Create a drill-through definition that will allow users navigate from the targeted report to other created reports> Enable report variables for drill-through definitions> Save report
- D. Create the target report> Create a drill-through definition that will allow users navigate from the targeted report to other created reports> Enable the drill behavior in the source report

Correct Answer: D

QUESTION 4

A report author wants to enhance a report by having the ability to display the data by region and filter by Order method (where Order method includes: Email, Fax, Post, Sales rep, Promo, Phone, Web site).

Americas	Asia Pacific	Central Europe	Northern Europe	Southern Europe	Email	Fax	Post	Sales rep	Promo	Phone	Web site
Retailer country	Company name	Revenue	Margin	Order method type							
Sweden	Campingspecialisten	\$3,051,204.78	10,101%	E-mail							
Sweden	Grand choix	\$1,726,778.08	4,183%	E-mail							
Denmark	København Brillecenter	\$13,152.01	213%	E-mail							
Sweden	Sport Jonas	\$4,771,209.54	13,543%	E-mail							
Netherlands	Sportworld	\$2,497,455.97	5,300%	E-mail							
Overall - Summary		\$4,686,775,768.85	19,403,090%								

How can this be accomplished?

- A. Select On-demand toolbar > Select checkbox group > Add default values
- B. Select Button Bar control > Go to properties > Change User interface to checkbox
- C. Create a parameterized filter from the order_method > Manually populate the parameterized
- D. Select the Button Bar control > From the on-demand toolbar > Click the ellipsis > Point to convert control > Click check box group

Correct Answer: A

QUESTION 5

A user is creating a join relationship in a Data module. What benefit can be expected from setting a filter join?

- A. The performance on the join could be improved.
- B. The result set from the join would return less rows.

C. The result set from the join would return more rows.

D. The join relationship would work on multiple fields in each table.

Correct Answer: A
