QUESTION 1

When the default active Content Manager fails, which of the following occurs?

- A. The system automatically activates all standby Content Managers, and spreads the load of requests based on the Weighted Round Robin load balancing mode.
- B. The system automatically activates all standby Content Managers and spreads the load of requests across them all.
- C. The system automatically switches to a standby Content Manager, and requests are directed to it.
- D. Users are prompted to rerun failed requests on the initial Content Manager once it is back on line.

Correct Answer: C

There are 2 load balanced report servers.

The dispatcher on Computer X has the following characteristics:

RAM: 1024 MB
CPU: Dual P4 1.5 Ghz
Hard drive: 80 GB

The dispatcher on Computer Y has the following characteristics:

RAM: 2048 MB
CPU: Dual P4 3.8 Ghz
Hard drive: 80 GB

What would an administrator set the processing capacity on Computer Y to?

- A. 1
 - B. 2
 - C. 4
 - D. 8
-

QUESTION 2

In IBM Cognos Connection, how can an administrator specify different prompt values and run options for a report without modifying the report itself?

- A. Schedule a report.
- B. Create a report view.
- C. Produce a report output.

D. Burst a report.

Correct Answer: B

QUESTION 3

An administrator has set up drill-through access in a package to run the target Query Studio report. By default, what happens when a user clicks the drill-through link?

- A. The report runs in IBM Cognos Viewer.
- B. The most recent report output is shown.
- C. The report runs and opens for editing in Query Studio.
- D. The user is prompted to run or edit the report.

Correct Answer: C

QUESTION 4

What must the administrator do to set up the sample audit reports that come with IBM Cognos BI?

- A. Create a separate data source connection to the content store.
- B. Set up an audit database and configure log messages to be sent to the database.
- C. Set up a log file and configure log messages to be sent to the file.
- D. Create a Framework Manager model using either a database or flat file as the data source, and then publish a package.

Correct Answer: D
