QUESTION 1

A Guardium administrator manages portal user synchronization by using a Central Manager.

When a change is made on the Central Manager such as, for example, adding a Guardium user to a Guardium group, how long should be allowed for the update to be synced with the managed units in a fully working environment?

- A. 0minutes
- B. 15 minutes
- C. 30 minutes
- D. 60 minutes

Correct Answer: D

QUESTION 2

A Guardium administrator needs to upgrade BUNDLE-STAP on a Linux server to the latest version using GIM. What parameter should the administrator set to ensure the upgrade will not require a reboot of the server?

- A. KTAP_ENABLED=1
- B. KTAP_NO_ROLLBACK=1
- C. KTAP_LIVE_UPDATE=Y
- D. KTAP_ALLOW_MODULE_COMBOS=Y

Correct Answer: C

QUESTION 3

A Guardium administrator needs to use CLI commands to maintain the internal database, clean static orphans, produce static system reports and to monitor live network traffic filtered by IP addresses and port numbers.

Which combination of commands should the administrator use for these tasks?

- A. diagandiptraf
- B. diag and trace_route
- C. jptrafandsupport must_gather
- D. support must_gatherandshow network verify

Correct Answer: C

QUESTION 4

A Guardium administrator must configure real time policy alerts to be sent to a remote SIEM for every SQL statement run on a sensitive object. There is no requirement for the data to be viewed or reported on in the Guardium appliance.

Which policy action would achieve that task and store the least amount of data in the Guardium internal database?

- A. Log Only
- B. Alert Only
- C. Alert Daily
- D. Alert Per Match

Correct Answer: C

QUESTION 5

A Guardium administrator has an issue with Guardium. The administrator has not seen this particular issue before and needs to get it fixed. To get this resolved, what should the administrator do?

- A. Log a PMR and request an answer from IBM Support.
- B. Log a PMR so IBM Support can contact the customer. Then, while waiting, do a search of the Guardium Knowledge Center and Technotes for known issues and resolutions.
- C. Request IBM Support to initiate a remote session and collect what they need to resolve the issue.
- D. Search Guardium Knowledge Center and Technotes for known issues and resolutions. Then, if still needed, collect must_gather information and full problem details required for a new PMR so that IBM Support can review the Problem before contacting the customer.

Correct Answer: D
