QUESTION 1

Which IBM Storage System can be directly attached to an IBM i partition on a POWER System?

A. IBM XIV

B. IBM FlashSystem 820

C. IBM FlashSystem 840

D. IBM DS8870

Correct Answer: D

QUESTION 2

A manager is evaluating XIV as a new storage solution because of an extensive utilization of snapshots in the production environment. The storage administration team is a mobile workforce and the manager is concerned about running out of snapshot capacity before an administrator can respond.

How can the solution architect respond to the manager\\'s concern?

A. Demonstrate the ability of the XIV to automatically convert LUNs to thin-provisioned within a storage pool to free up space for snapshots.

B. Show how the storage administrator can remotely increase the size of the available snapshot space in a pool by using the mobile dashboard.

C. Provide details on IBM Custom Technical Support, which automatically includes remote administration of an XIV system.

D. Explain how custom alerting can be configured in the GUI and push notifications can be sent from IBM support to an Apple or Google service.

Correct Answer: D

QUESTION 3

Which drive type in the DS8870 should be selected for data that has been identified as inactive?

A. Enterprise SAS

B. Flash

C. Nearline SAS

D. DRAM

Correct Answer: C

QUESTION 4

A customer has several legacy storage arrays containing many hot spare disks. The customer has heard that the IBM XIV does not have any hot spares.

What should the technical specialist explain to the customer about the way the IBM XIV works?

A. The IBM XIV has four hot spares per module to allow for multiple hot spare failures at one time.

B. Legacy storage arrays with hot spares take hours to rebuild extending the failure window.

C. The IBM XIV has two hot spare drives per module to handle failures.

D. Each drive has spare capacity and spreads the data across the spare capacity of each drive.

Correct Answer: D

QUESTION 5

A customer has requested an IBM Spectrum Virtualize solution with capability to make it easy for users to create relevant and meaningful custom reports.

What should the solution architect propose to satisfy this requirement?

A. Native IBM Spectrum Virtualize performance tool(s)

B. Excel macros linked to storage API

C. Svcmon with daily data collection

D. IBM Spectrum Control

Correct Answer: A
