QUESTION 1

How do you set the condition in an if-then statement?

- A. use the value of a string or a reference to control executing specified HTTP requests
- B. select a reference that has been previously defined in the test
- C. enter a string that has been previously defined in the test
- D. set a condition that can be evaluated to be true or false

Correct Answer: A

QUESTION 2

Workload analysis is a design-time activity that includes which four processes? (Choose four.)

- A. identifying the performance bottlenecks of the application
- B. identifying the workload to be simulated or emulated in the performance tests, in terms of number of actors or actor classes and actor profiles
- C. identifying the actors and actor characteristics to be simulated or emulated in the performance tests
- D. clarifying the objectives of performance testing and the use cases
- E. determining the performance measures and criteria
- F. identifying the quality of application architecture

Correct Answer: BCDE

QUESTION 3

When should you use a synchronization point when conducting a performance test?

- A. to run multiple tests simultaneously
- B. to time the start and end of performance tests
- C. to enable you to coordinate the activities of a number of virtual users
- D. to work with multiple performance test tools

Correct Answer: C

QUESTION 4

What is the purpose of enhancing schedules?

- A. to increase the performance of the test
- B. to emulate workload analysis as closely as possible
- C. to create a group of tests to run
- D. to determine the best time to run a test

Correct Answer: B

QUESTION 5

Which counters are used to collect information about execution time in a test run?

- A. test
- B. byte
- C. page
- D. run
- E. transaction

Correct Answer: A
