QUESTION 1

A multinational corporation requires their coaches to be translated into the users' native language. A BPM application developer has not provided translations for all the languages. What must the BPM application developer do to handle situations

where a user's selected language is not supported and a default is required?

To designate the default label, the BPM application developer must create:

- A. a coach view configuration option for the default label
- B. a localization resource with a default local key, and create a default local value
- C. a key-value pair list local variable and set the label to the default local key in the user's browser
- D. a default label using an environment variable and set it to the default language in the user's active directory profile

Correct Answer: C

QUESTION 2

After deploying a new snapshot and migrating in-flight instances to the new snapshot, a BPM application developer has found some instances with orphaned tokens. Which API must the BPM application developer use to manage the orphaned tokens?

- A. Java
- B. REST
- C. JavaScript
- D. Web Services

Correct Answer: B

QUESTION 3

A bank has a loan request process with a user task called Approve Loan that is performed by members of the Underwriting Department. In order to reduce risk, the bank has a requirement, that only the senior underwriters can approve loans

over a certain amount.

What must the BPM application developer use to meet this requirement?

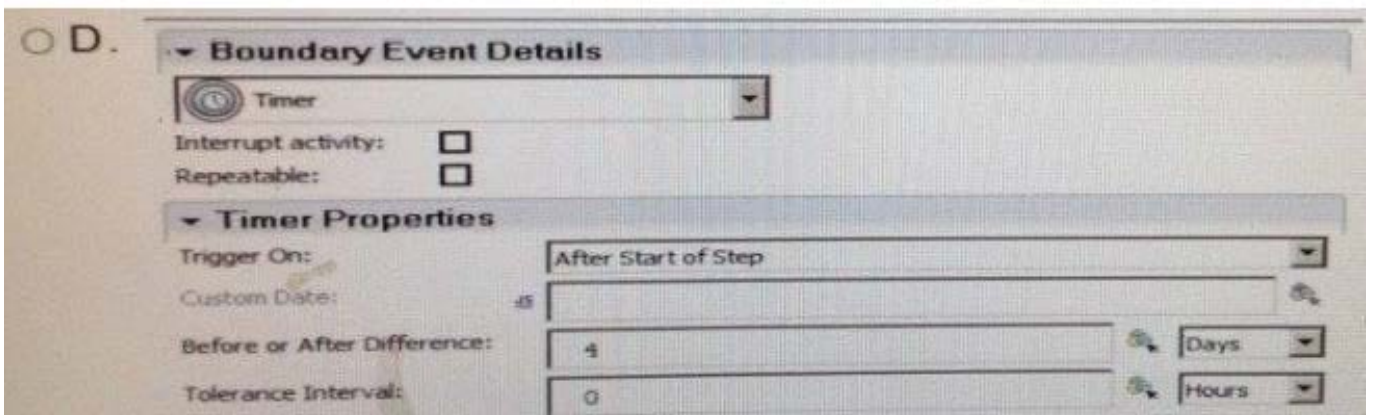

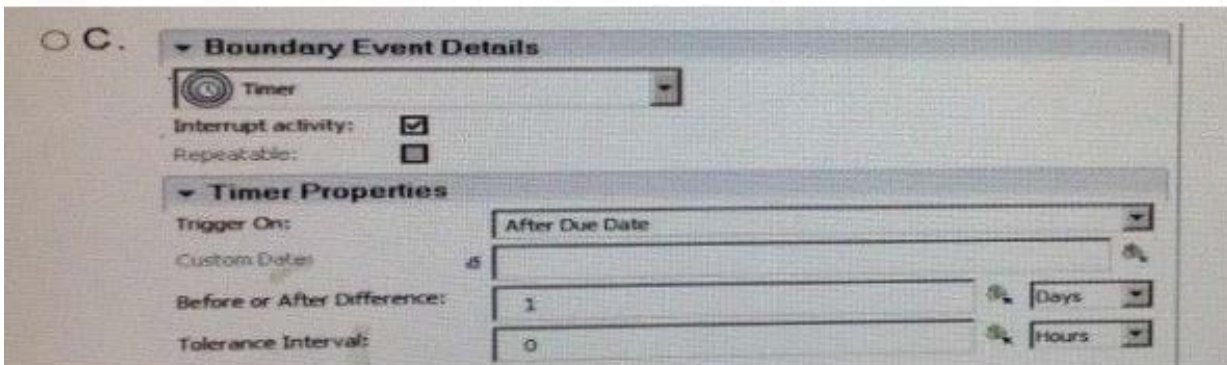

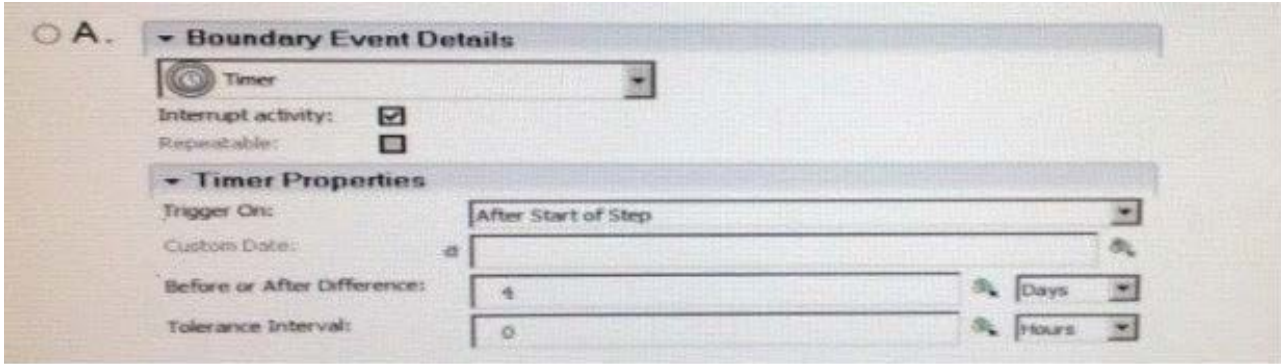

- A. Ajax service
- B. Web service
- C. Team filter service

D. Team retrieval service

Correct Answer: C

QUESTION 4

An insurance company has a claims process that is performed by a claims analyst and is due in 3 days. If the claims analyst has not completed the task in 4 days an escalator should be sent to a manager. The claims analyst can still complete the task, even if the escalator has been triggered, and the manager should only be notified once. Which configuration should the BPM application developer implement for the escalator timer?

A. Exhibit A

B. Exhibit B

C. Exhibit C

D. Exhibit D

Correct Answer: A

QUESTION 5

A company has a healthcare enrollments business process that is to be implemented worldwide for all of its employees. Part of the employment process are a set of steps that the company uses in several other business processes. These steps may need to vary depending on the laws of different countries and the plans that are offered in each country. The company wants to have a single process that is followed in every country but needs to be sure that the portion of the process that is subject to local laws will comply with the laws of each country. Which BPM component should the BPM application developer use to meet these requirements?

A. Subprocess

B. Linked Process

C. Dynamic Process

D. Event Subprocess

Correct Answer: D
