### QUESTION 1

In Heuristics for the Travel Distance Calculation, how system calculate Depth-first search? Please choose the correct answer Response:

- A. The system attempts to find a route between the specified nodes of a network in the average time possible. Here, the search runs in the direction of start node to end node. The search finishes when the last complete route is found.
- B. The system attempts to find a route between the specified nodes of a network in the average time possible. Here, the search runs in the direction of start node to end node. The search finishes when the first complete route is found.
- C. The system attempts to find a route between the specified nodes of a network in the shortest time possible. Here, the search runs in the direction of start node to end node. The search finishes when the first complete route is found.
- D. The system attempts to find a route between the specified nodes of a network in the longest time possible. Here, the search runs in the direction of start node to end node. The search finishes when the first complete route is found.

Correct Answer: C

---

### QUESTION 2

Which of these functions are available in Warehouse Management? There are 2 correct answers to this question. Response:

- A. Processing goods movements
- B. Managing inventory at the storage bin level
- C. Processing sales orders
- D. Purchasing goods

Correct Answer: ABC

---

### QUESTION 3

Sometimes it is required to include the actual invoice in the shipment when it leaves the warehouse. For a direct outbound delivery, especially for a pickup process where you want the buyer to pay immediately, you might want to issue the invoice before you post the goods issue (which would normally trigger the invoice print). For these cases, you can use the invoice before goods issue process to create and print the invoice before the goods issue is posted. Which statements are not correct given below. There are 2 correct answers to this question. Response:

- A. For single requests from EWM, CRM billing or ERP billing directly creates single invoices that you can change
- B. For single requests from EWM, CRM billing or ERP billing directly creates single invoices that you cannot change
- C. If you want to print invoices for the contents of a vehicle or transportation unit, EWM triggers the invoice printout in CRM billing or ERP billing by sending the message Print Billing Document.
- D. If you want to print invoices for the contents of a vehicle or transportation unit, EWM triggers the invoice printout in CRM billing or ERP billing by sending the message Print Invoice Document.

Correct Answer: AD

---

**QUESTION 4**

After completing all value-added services, the system moves the products in the following areas There are 2 correct answers to this question. Response:

- A. Goods issue area
- B. Shipping plant
- C. Final storage bin
- D. Final Warehouse

Correct Answer: AC

---

**QUESTION 5**

You are using delivery-based production integration. Which of the following are created for the outbound delivery in ERP for staging?

There are 2 correct answers to this question.

- A. An outbound delivery order in EWM when the supplying storage location is connected to EWM and the receiving storage location has NO warehouse management.
- B. An internal stock transfer in EWM when the supplying and the receiving storage locations are the same.
- C. A posting change document in EWM when the supplying and receiving storage locations are assigned to the same warehouse number
- D. An inbound delivery in the receiving warehouse when the supplying and the receiving storage

Correct Answer: CD
