QUESTION 1

Storing raw data in PSA data packages is recommended when the data will update multiple data targets or when the amount of data being extracted is large. Determine whether this statement is true or false.

- A. True
- B. False

Correct Answer: A

QUESTION 2

A Conceptual description of data objects, their attributes, and the relationships between them is :

- A. A data model
- B. An InfoCatalog
- C. An InfoSet
- D. An InfoSource

Correct Answer: A

QUESTION 3

The EDW Core Layer includes all layers that contain consolidated and harmonized data. Determine Whether this statement is true or false.

- A. True
- B. False

Correct Answer: A

QUESTION 4

Which of the following statements are true regarding the difference between compounding and concatenation?

- A. Compounding is easier to filter in queries because the objects are separate whereas with concatenation, the key string needs to be masked
- B. Compounding is easier for users to understand because it is based on a 1:1 object mapping but concatenation is more complex for users to understand and decipher
- C. Concatenation uses a single key value but compounding uses more than one
- D. Adding key fields in concatenation is easier because only the transformation needs to be changed but in

compounding structures need to be changed and data re-loaded

E. Compounding is supported in the definition of the InfoObject whereas concatenation requires the creation of new database tables

Correct Answer: ABCD

QUESTION 5

Which statements about process chains are true?

- A. Process chains have a graphical design GUI.
- B. Process chains have log, checking and planning views.
- C. Process chains have many process types to control your BI project.
- D. Collector process include AND and OR and EXOR.

Correct Answer: ABCD
