QUESTION 4

Fabric Ledger has two specific parts. Select answer with the proper two parts.

- A. State Data, Transactional Data
- B. State Data, Transaction logs
- C. LevelIDb, CouchDB
- D. Transaction Logs, CouchDB

Correct Answer: B

Fabric Ledger has two parts: ?State data: Representation of current state of the assets. Asset state data can be changed upon changes to the state of the data. ?Transaction Logs: Record of all the transactions (in the order they are received) which modified the state data, and once the data is written it is immutable and cannot be changed.

QUESTION 5

Consider the following scenario: Due to consistent inaccuracies and outdated real estate listings, a residential real estate company wants to build a blockchain solution that accurately depicts which homes (assets) are available for purchase across all countries/provinces. All available homes should be publicly viewable by the general consumer audience, but certain details of the home, such as history of maintenance, should only be viewable by licensed real estate professionals.

Which architecture would best solve the product need?

- A. Public data hosted on a public blockchain, Privileged data security hoisted on a private database
- B. The entire solution built on a private blockchain with proper permissions for both public and privileged data
- C. Public and privileged data on hybrid blockchain will Proof of Stake consensus
- D. Public data hosted on a public blockchain; Privileged data hosted on a private blockchain

Correct Answer: D
