QUESTION 1

A major theme park is expanding the existing facility over a five-year period. The design phase will be completed one year after the contract is awarded. Major engineering drawings will be finalized two years after the design contract is awarded and construction will begin three years after the award of the design contract. New, unique ride technology will be used and an estimate will need to be developed to identify these costs that have no historical data.

Resource planning must take all of the following into account except:

- A. Types of materials, equipment and labor skills required to complete the project
- B. Cash flow (expenditures) limitations for completing work on the project
- C. Time available to complete the project
- D. Earned value techniques established for the project

Correct Answer: D

QUESTION 2

An agricultural corporation that paid 53% in income tax wanted to build a grain elevator designed to last twenty-five (25) years at a cost of \$80,000 with no salvage value. Annual income generated would be \$22,500 and annual expenditures were to be \$12,000.

Answer the question using a straight line depreciation and a 10% interest rate.

The following question requires your selection of CCC/CCE Scenario 17 (4.2.50.1.1) from the right side of your split screen, using the drop down menu, to reference during your response/choice of responses.

Depreciation (in the United States) is calculated in accordance with which of the following?

- A. Modified Accelerated Cost Recovery System (MACRS)
- B. The Federal IRS Reform Act (FIRSRA)
- C. Generally Accepted Accounting Practices (GAAP)
- D. Accelerated Cost Recovery System (ACRS)

Correct Answer: D

QUESTION 3

Money is value. Having money when you need it is very important. Money can also be valuable when used wisely by knowing when to spend and when to conserve. Also, planning now for future expenses can be a plus to the company rather than a debit.

There are several ways to capitalize money and spending. Basically there is the single payment method that has a compound amount factor and a present worth factor. There is the uniform annual series that has a sinking fund factor, capital recovery factor and also the compound amount factor and present worth factor. At this point, we can assume

money is worth 10%.

The following question requires your selection of CCC/CCE Scenario 7 (4.8.50.1.1) from the right side of your split screen, using the drop down menu, to reference during your response/choice of responses.

If \$10,000 is invested now at 10% compounded annually, what will the investments be worth 10 years from now?

- A. \$25,940
- B. \$29,450
- C. \$21,345
- D. \$16,180

Correct Answer: A

QUESTION 4

A major theme park is expanding the existing facility over a five-year period. The design phase will be completed one year after the contract is awarded. Major engineering drawings will be finalized two years after the design contract is awarded and construction will begin three years after the award of the design contract. New, unique ride technology will be used and an estimate will need to be developed to identify these costs that have no historical data.

The project scheduler left the company and has left unfinished work. You have been hired as the new project scheduler and must update the existing schedule. What will be your first task?

- A. Recalculate the early finish for each activity
- B. Recalculate the early start for each activity
- C. Update the remaining duration for each activity
- D. Recalculate the critical path

Correct Answer: D

QUESTION 5

_____ can be defined as the determination of that course of action or combination of alternatives that yields either the lowest cost or the highest profit.

- A. Economic optimization
- B. Simulation
- C. Linear programming
- D. Dynamic programming

Correct Answer: D
